PLCnext Technology Configuration and Engineering

Fast and flexible configuration

- C-Code, Simulink models, function components, IEC61131-3, Safety, HMI

Extendable

- By licensed add-ins like the Viewer for Simulink

Easy handling

- Intuitive user interface
- Clear structures

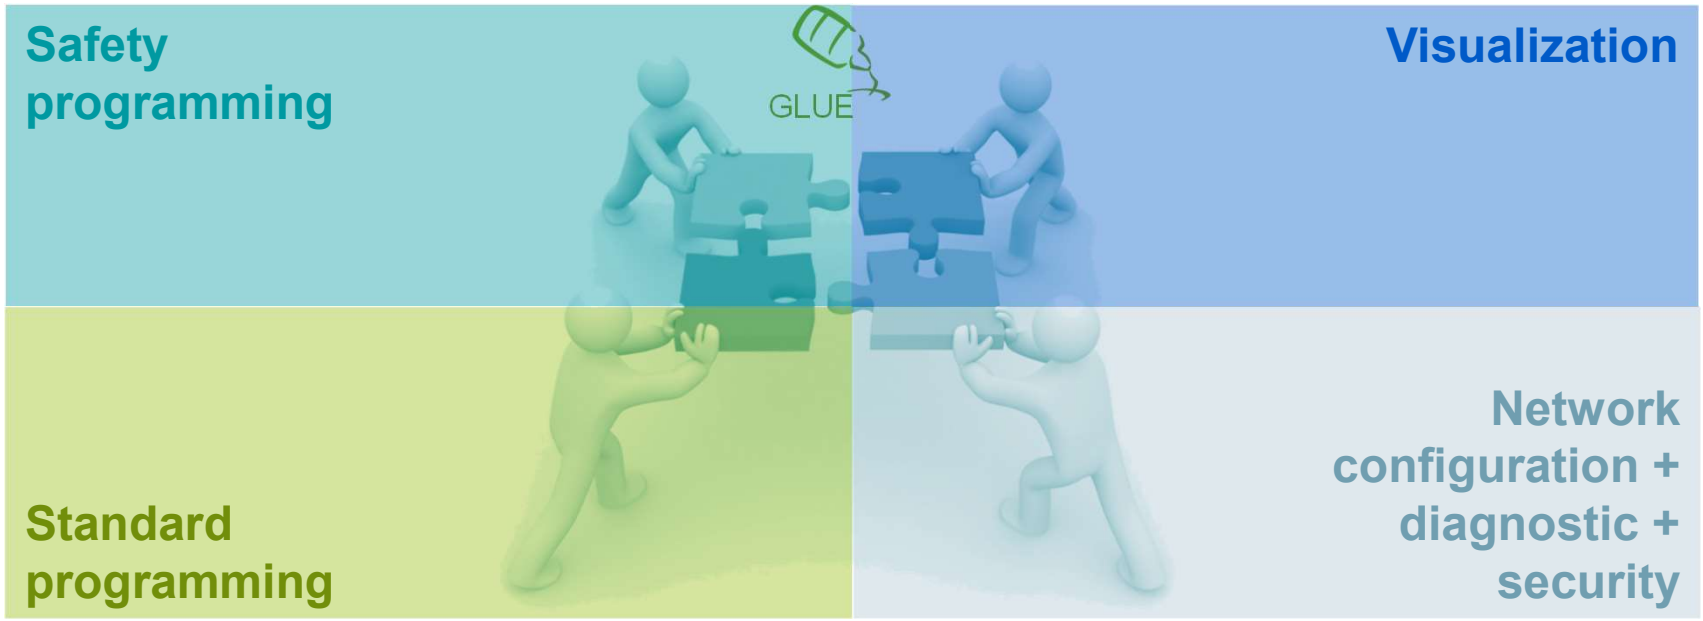
The software for configuration and engineering

PHOENIX CONTACT
INSPIRING INNOVATIONS

PLCnext Technology
Designed by PHOENIX CONTACT

PLCnext Engineer

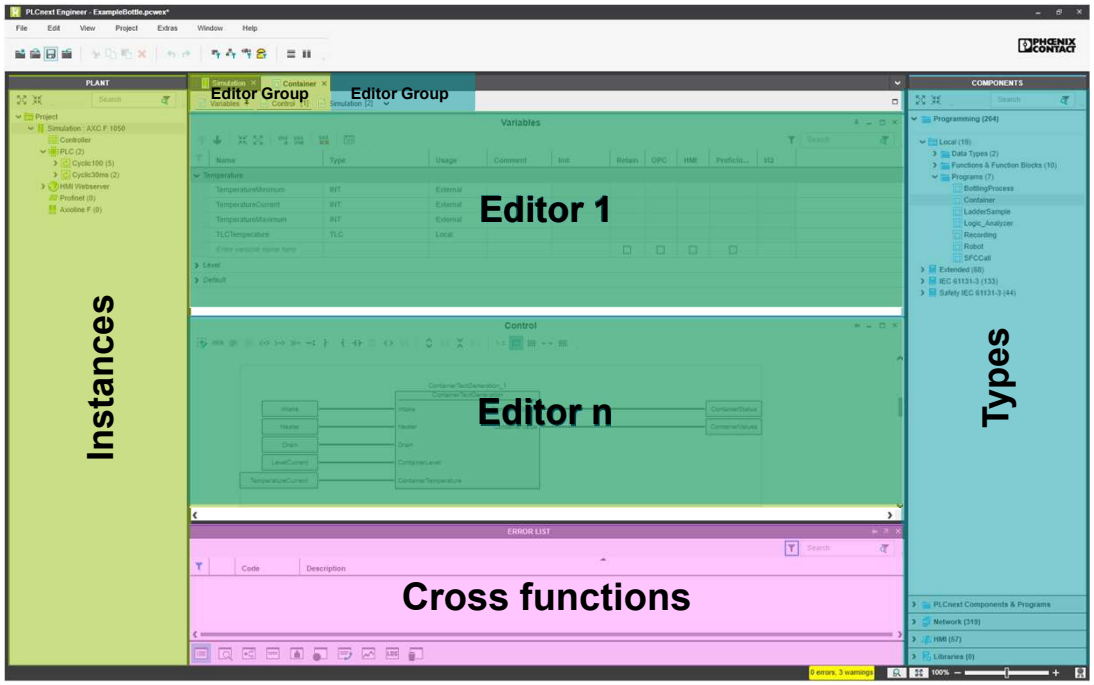
Complete Integrated System



PHOENIX CONTACT
INSPIRING INNOVATIONS

PLCnext Technology
Designed by PHOENIX CONTACT

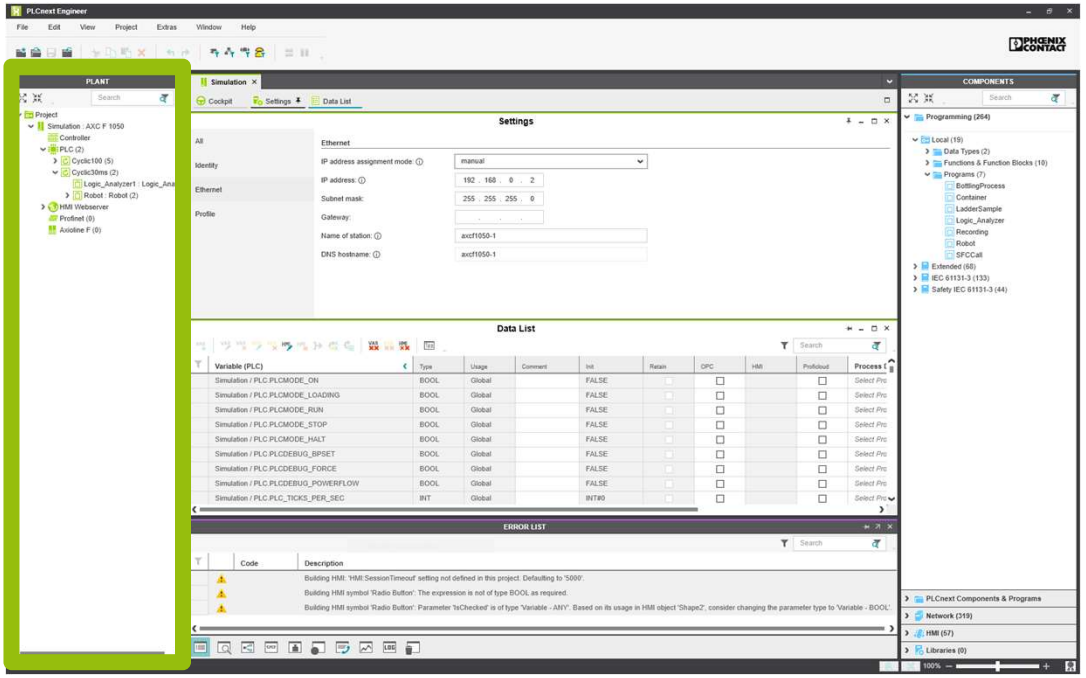
Information Architecture



PHOENIX CONTACT
INSPIRING INNOVATIONS

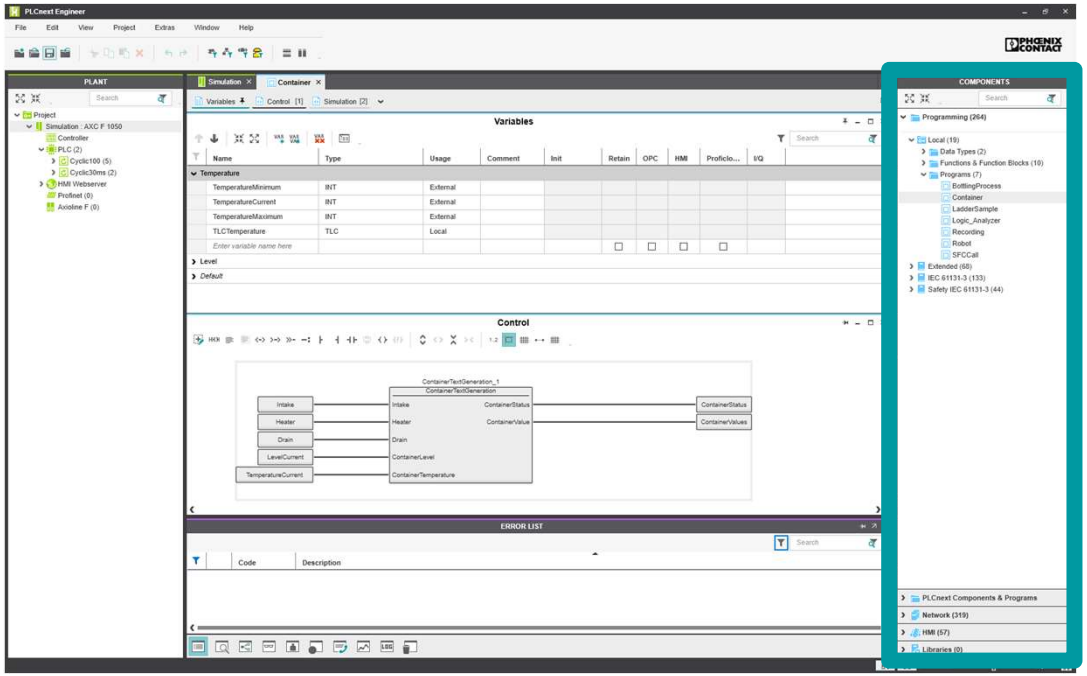
The User Interface – Plant Area

- Instance trees
  - Programs
  - Visualization pages
  - IO configuration
- Task configuration
- Controller configuration
- Central Cockpit
  - Application control
  - Device information



PLCnext Engineer

The User Interface – Component Area

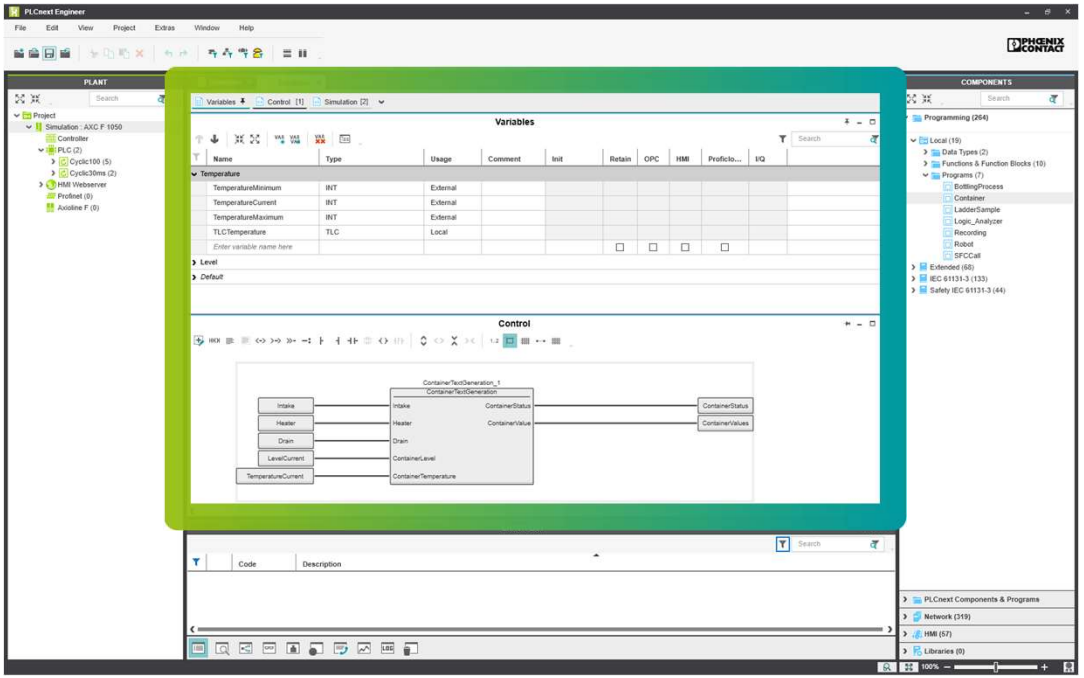


- IEC 61131-3
  - Programs, functions and function blocks
  - Data types
- Device catalogue
  - Import of devices
- Visualization symbol library
- References to libraries

PLCnext Technology
Designed by PHOENIX CONTACT

The User Interface – Editor Area

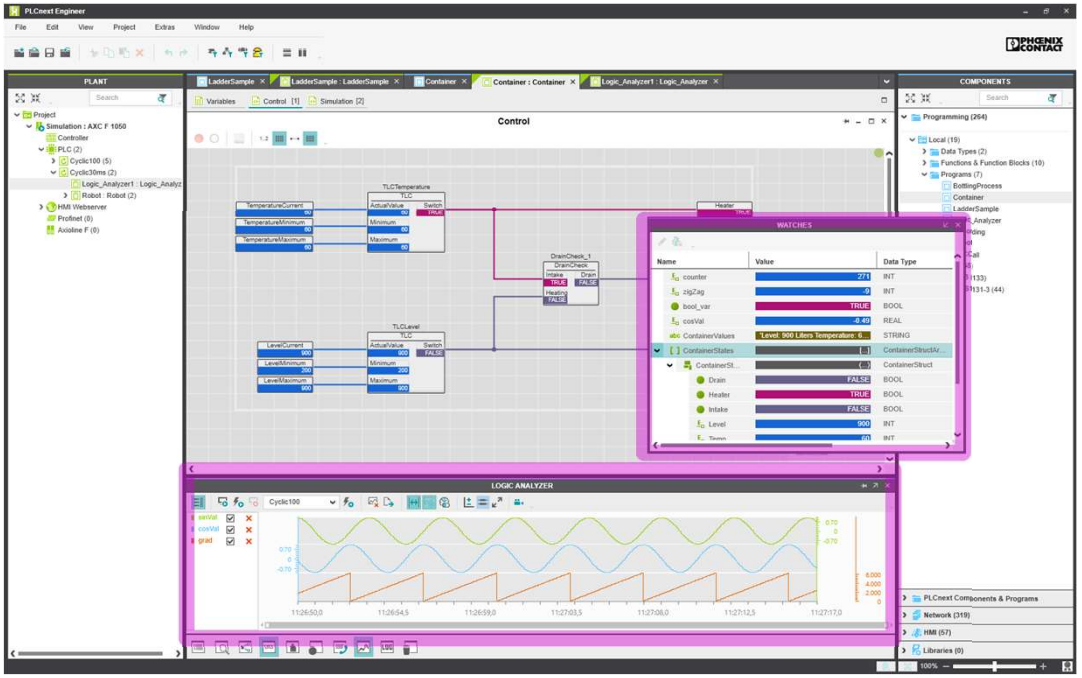
- Central editing
- Split view windows
- Full screen windows
- Arrange multiple editor windows
- Type or instance Editor color highlighted



PHOENIX CONTACT
INSPIRING INNOVATIONS

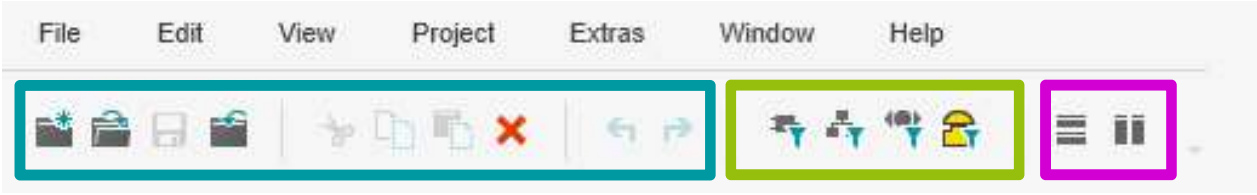
The User Interface – Cross Function Area

- Undockable windows
- Message window
- Global find & replace
- Cross references
- Watch window
- Debug information
- Logic analyzer
- Logging
- Recycle bin



PLCnext Technology
Designed by PHOENIX CONTACT

The User Interface – Menu Bar

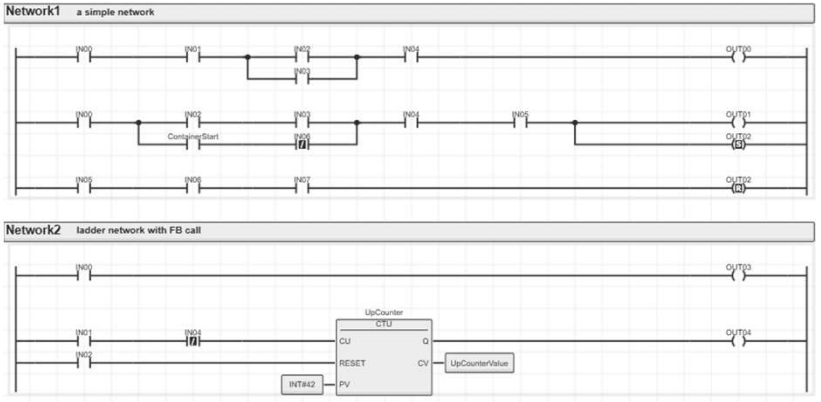


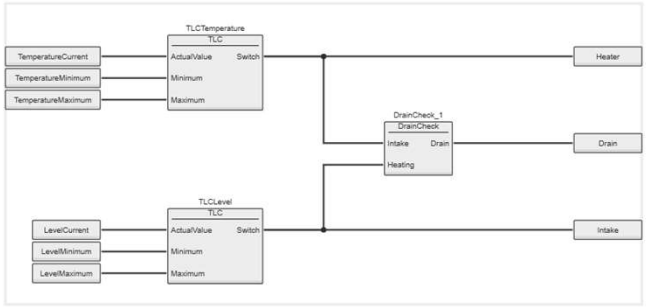
- **Standard functions**
  Windows conform
  - Project handling
  - Cut / copy / pase objects
  - Delete objects
  - Undo / redo
- **System filter**
  Show or hide information
  - Programming objects
  - Network related objects
  - HMI related objects
  - Safety related objects
- **Split Screen function**
  Arrange two editor groups
  - Horizontal split mode
  - Vertical split mode

PHOENIX CONTACT
INSPIRING INNOVATIONS

IEC 61131-3 Editors

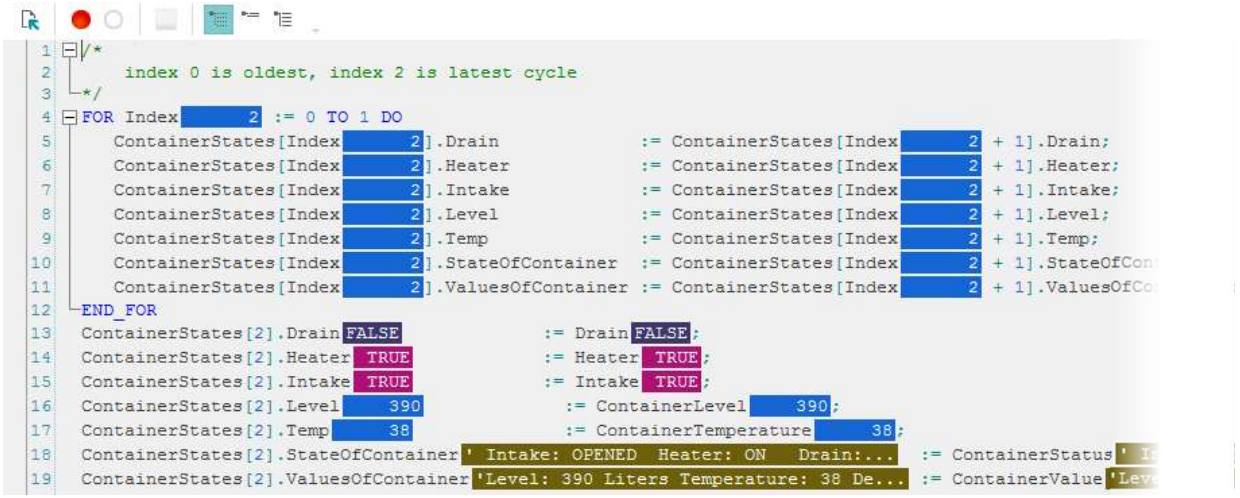
- **Graphical programming**
  - Function Block Diagram (FBD)
  - Ladder (LD)
  - Network based or free graphical editor
  - Methods on function blocks in graphical languages





IEC 61131-3 Editors

- **Structured Text (ST)**
  - Syntax highlighting
  - Autofill assistant
  - IntelliSense function
  - Folding of code segments
  - RolePicker assistant
  - Templates for statements
  - Methods on function blocks



PLCnext Engineer

Integrated Visualization Editor

- **Deeply integrated**
  - Based on central handling
- **Scalable**
  - From small scale controllers to IPCs
- **No client installation**
  - Modern web browser
- **Technology-neutral**
  - Screens are stored in neutral format
- **Lightweight**
  - Low resource demands on PLC

PLCnext Technology
Designed by PHOENIX CONTACT

PLCnext Engineer

Integrated Visualization Editor

- Definition of single line expressions
  - IntelliSense completions
  - Semantic analysis
- Integrated online mode
  - Everything in one environment

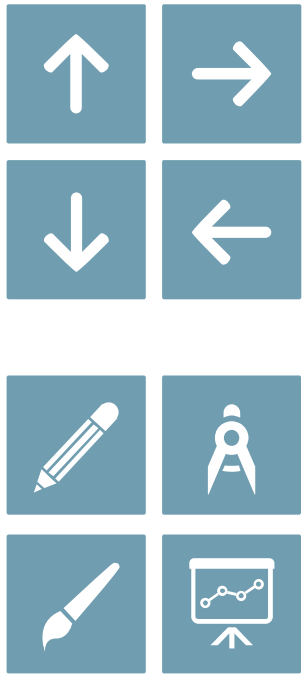
PHOENIX CONTACT
INSPIRING INNOVATIONS

PLCnext Technology
Designed by PHOENIX CONTACT

PLCnext Engineer

Integrated Visualization Editor

- Navigation Editor
  - Graphical definition of basic navigation structures (swipe up, right, left, or down)
  - Easy assembly of navigation structures through drag & drop
  - Content of a page is displayed within thumbnails
- Consistent library handling
  - Easy to use symbol editor



PHOENIX CONTACT
INSPIRING INNOVATIONS

PLCnext Technology
Designed by PHOENIX CONTACT

PLCnext Engineer

Integrated Visualization Editor

- User Management
  - Access right configuration of objects
  - Management via IEC 61131-3 function blocks possible
  - Authentication object template

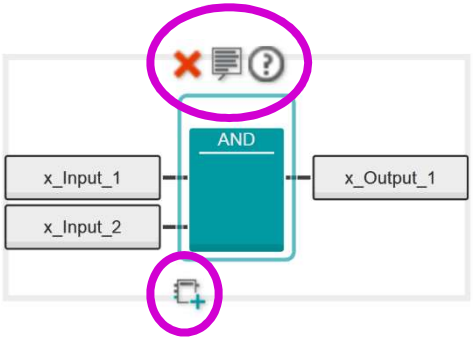
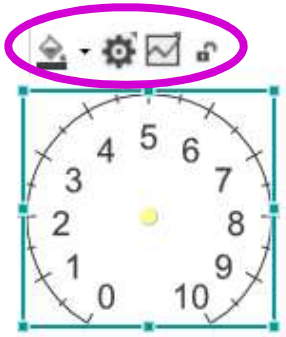
Usability Features Examples

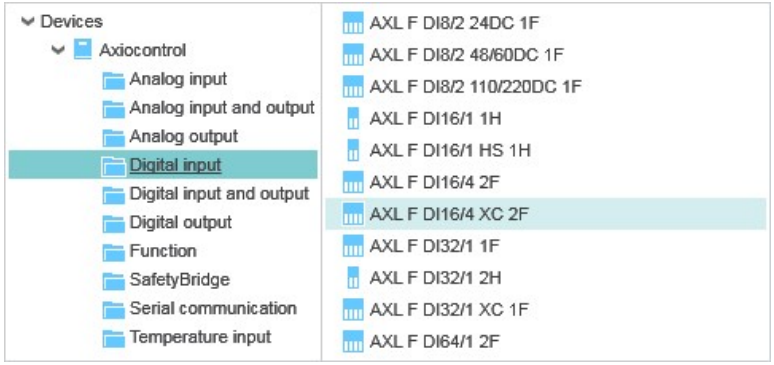
PLCnext Technology
Designed by PHOENIX CONTACT

InPlace Actions

- Placed directly beside graphical objects
- Offer the most important functions







RolePicker

- Offers only usable objects
- Smart filter mechanism
- Pre-selection in categorized folders

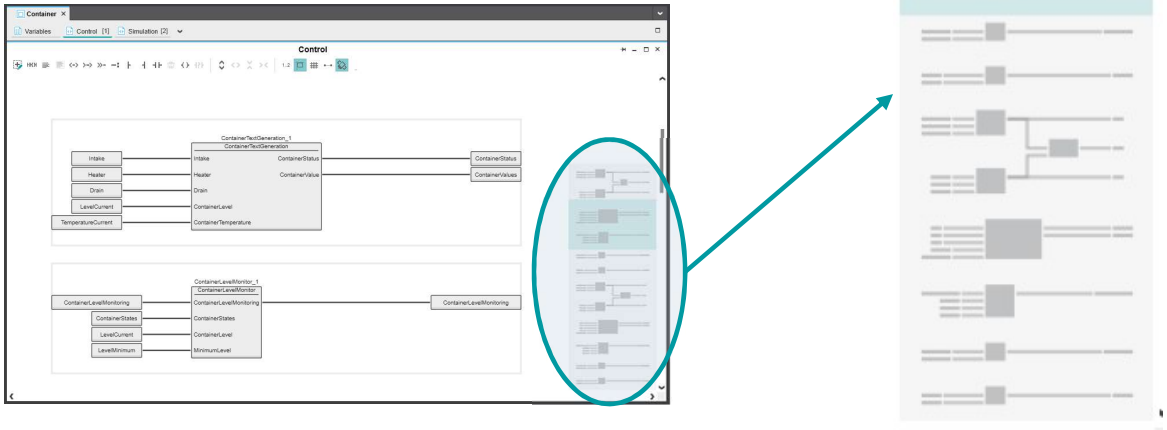
- Shown in hardware selection
- Shown in process data assignment, …

PHOENIX CONTACT
INSPIRING INNOVATIONS

PLCnext Engineer

Fast Navigation through Graphical Code

- Overview windows for graphical code editors
  - Switch off and on by button
  - Zoom in and out in overview window

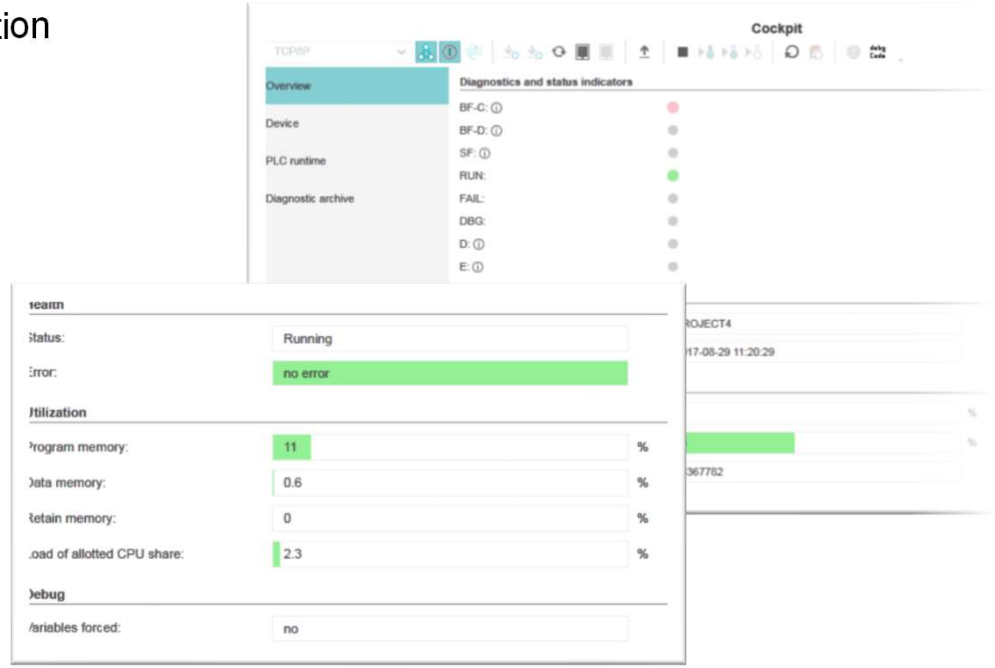


PLCnext Technology
Designed by PHOENIX CONTACT

PLCnext Engineer

Commissioning and Troubleshooting

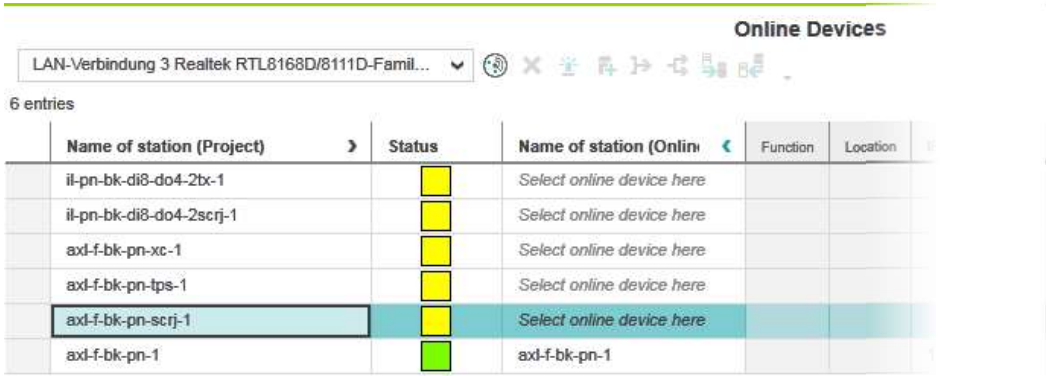
- Central Cockpit with application information
  - Send and control the application
  - Get controller status
  - Get application status
  - Diagnostic archive
- Logic analyzer
- Watch windows
- Breakpoints / single step
- Online debugging in libraries
- Instance / Function debugging
- Execution value



PHOENIX CONTACT
INSPIRING INNOVATIONS

Network Configuration

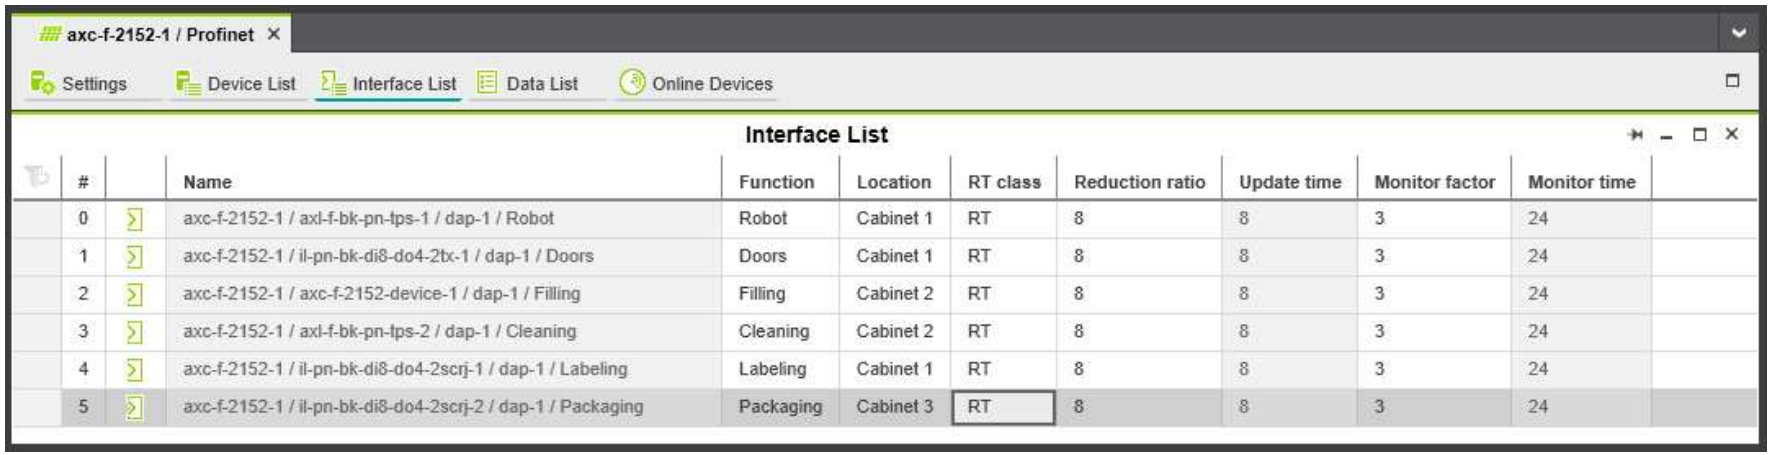
- Local bus configuration of controller
  - Configuration with RolePicker
  - Read in connected devices
- Profinet IO configuration
  - Complete device catalogue
  - Import devices via GSDML standard
  - Discover and connect online devices
  - Read in online devices



PLCnext Engineer

Profinet Configuration

Most important settings are now available in one table and will be improved for further settings



#		Name	Function	Location	RT class	Reduction ratio	Update time	Monitor factor	Monitor time
0		axc-f-2152-1 / axl-f-bk-pn-tps-1 / dap-1 / Robot	Robot	Cabinet 1	RT	8	8	3	24
1		axc-f-2152-1 / il-pn-bk-di8-do4-2tx-1 / dap-1 / Doors	Doors	Cabinet 1	RT	8	8	3	24
2		axc-f-2152-1 / axc-f-2152-device-1 / dap-1 / Filling	Filling	Cabinet 2	RT	8	8	3	24

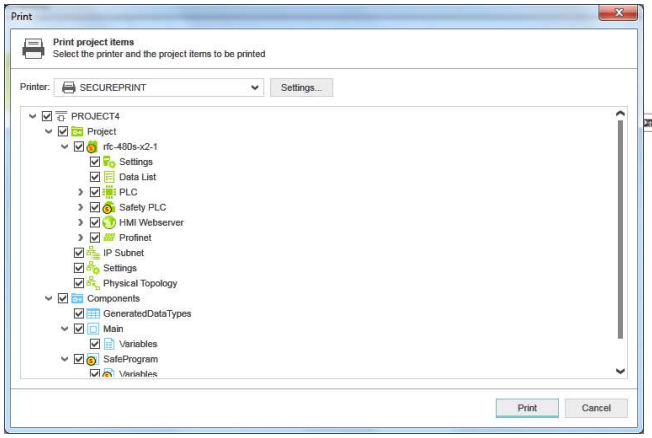
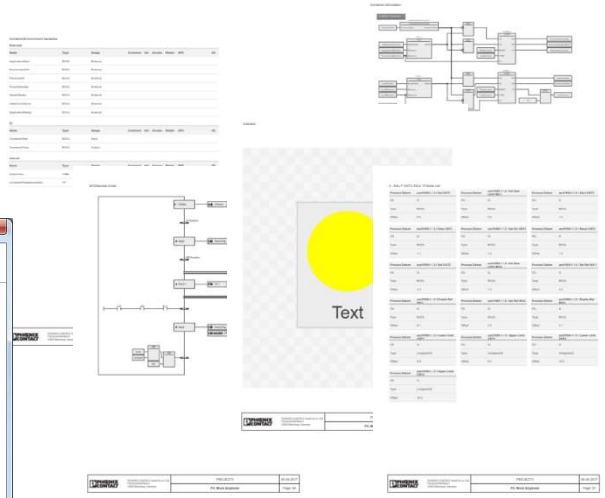
5		axc-f-2152-1 / il-pn-bk-di8-do4-2scrj-2 / dap-1 / Packaging	Packaging	Cabinet 3	RT	8	8	3	24

PLCnext Engineer

Project Documentation

- Function / location / reference instead of BMK
- Printout project:
  - Code
  - Data Lists
  - HMI screens and objects
  - Safety application



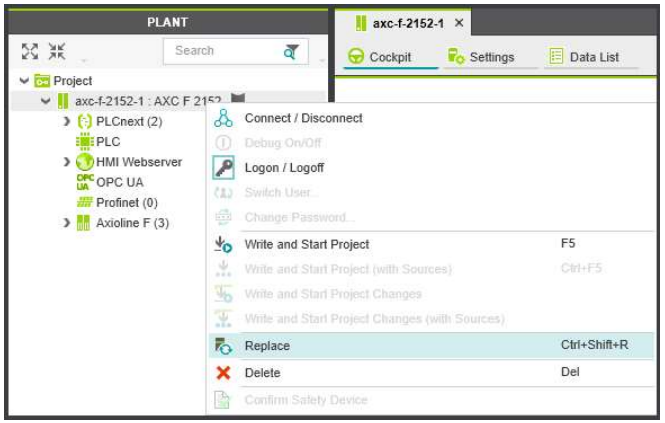


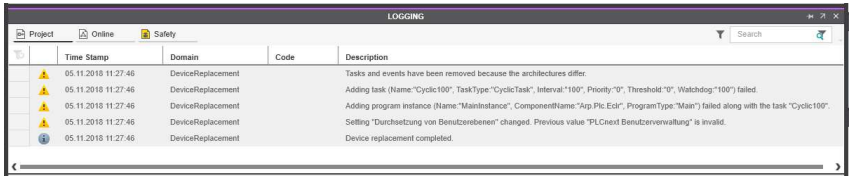
PLCnext Technology
Designed by PHOENIX CONTACT

PLCnext Engineer

Device Replacement

- Replace device type at any level
  - Controller
  - Profinet device, module, submodule
  - Axioline F device,
  - IB Inline device
- Keep data of existing object
  - Subsystem
  - Process data connections,
  - Function & Location,
  - Parameters, Settings, Programs, ESM, HMI, ...





PHOENIX CONTACT

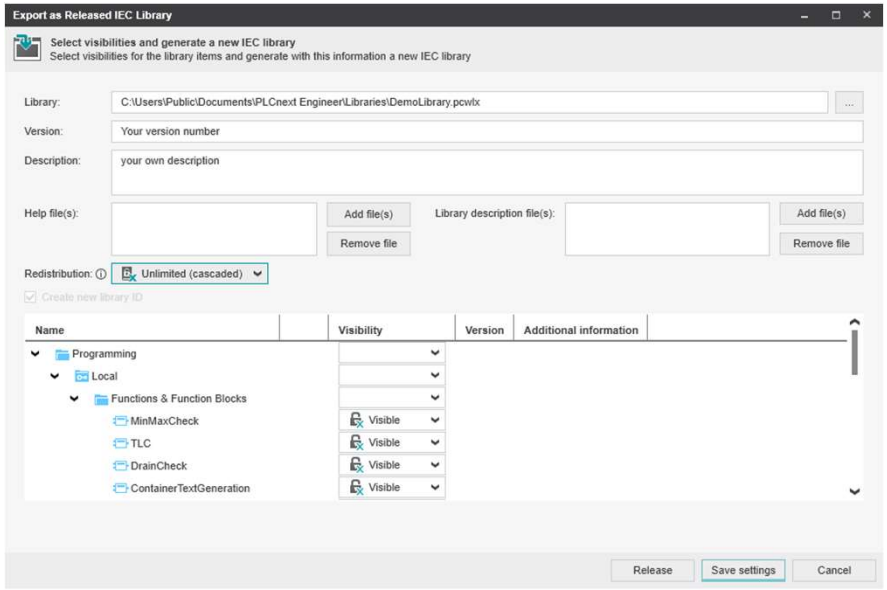
PLCnext Engineer

User Library Management

- One standard library release function for:
  - Standard IEC 61131-3 Code
  - Safety code
  - HMI symbols
  - Devices
- Additional features
  - *.chm Help integration for user POU‘s
  - Localized help
  - Library description via tooltip
  - PLCnext component libraries for MultiTargets



PHOENIX CONTACT
INSPIRING INNOVATIONS

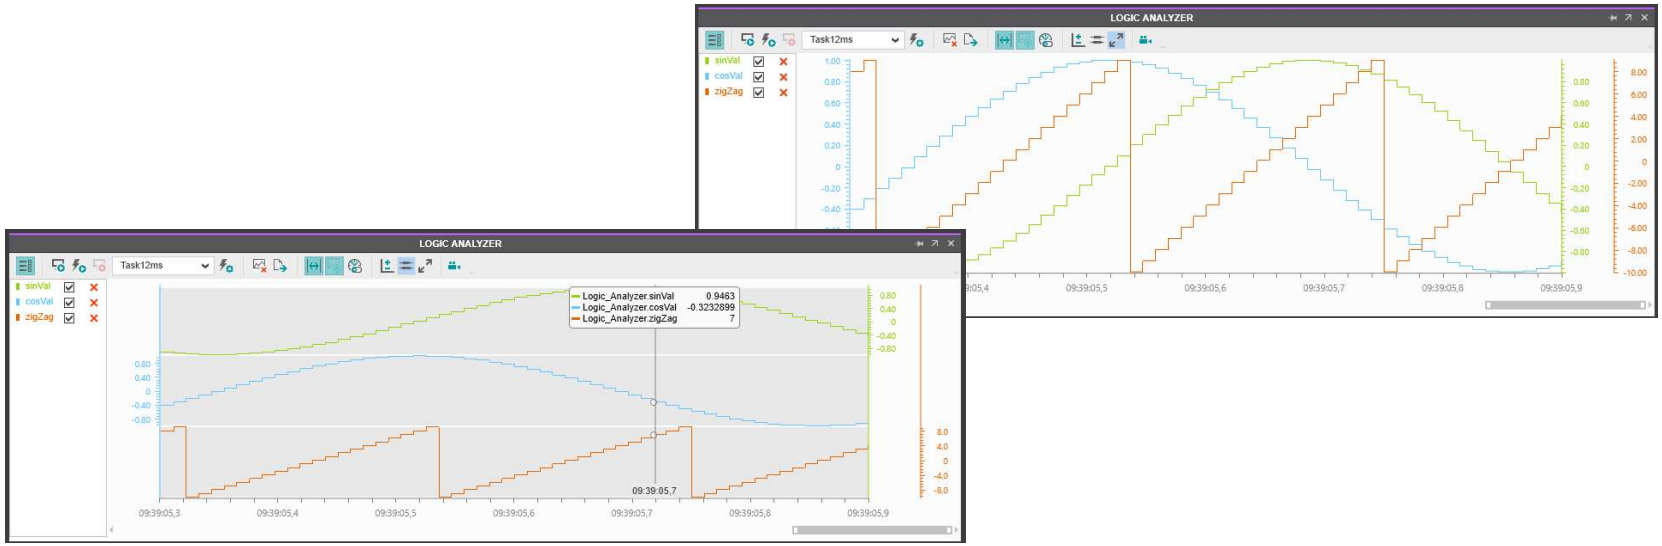
Project Statistics Page

- First stage of a project statistic:
  - Project limits overview
  - POU usage in detail
  - Check of limits beforehand

PLCnext Engineer

Logic Analyzer

The **Logic Analyzer** function of PLCnext Engineer can now also be used with PLCnext Controls.



PLCnext Technology
Designed by PHOENIX CONTACT

Extended Qualifiers in IEC 61131-3 Variable Names

- Option to switch on
  - Open the 'Compiler > IEC Compiler Settings' section in the Options dialog, activate the 'Allows extended identifiers' checkbox confirm.

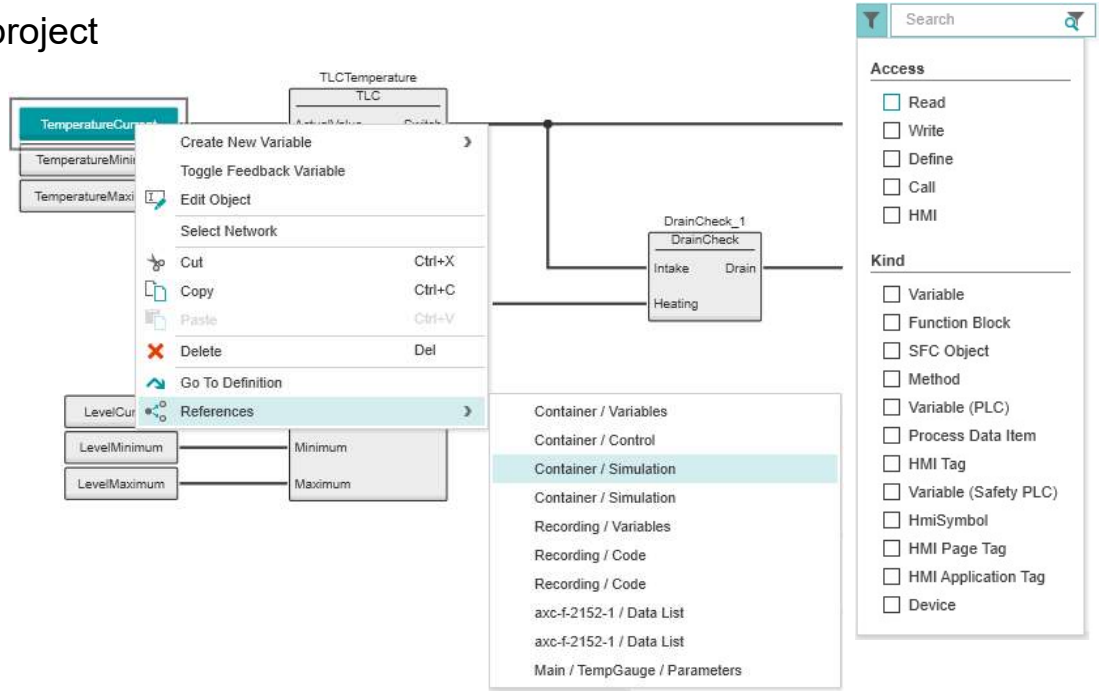
- Rules for using
  - at least contain one alphabetical character.
  - not start with multiple underscores.
  - not start like a constant with <literal_prefix># or keywords.
  - **/ * - + < >** are **regular operators** in textual programming languages, separated them by whitespaces.

PHOENIX CONTACT
INSPIRING INNOVATIONS

PLCnext Engineer

Find Variable Access faster

- X-Reference windows for the whole project
  - Additional „kind“ attribute
  - More HMI data
    - Symbol instances
    - Tags
  - Extended filter
- Local X-References at each variable in context menu



Documentation

- Property editor for project and HMI symbols
  - Import/Export as HTML
  - Version table
  - Enhanced text properties
  - Insert tables
  - Insert pictures

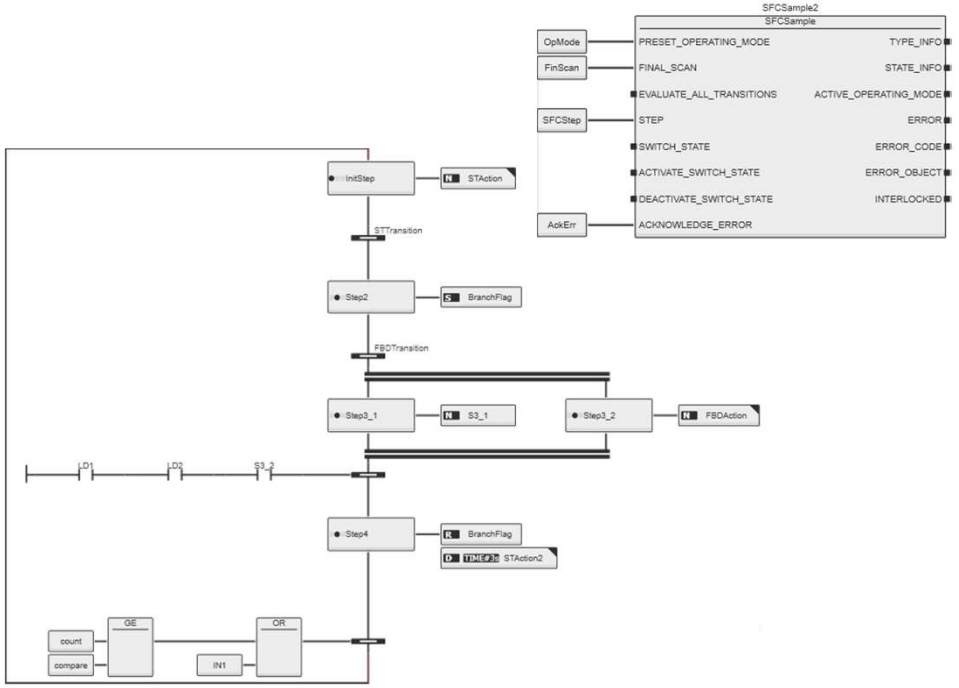
Sequential Function Chart – SFC

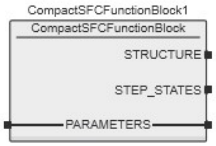
- Represented as a function block
- Automatic generated TypeInfo and StateInfo structure
- Error handling
- Directly connected transitions
- Transitions in separate worksheets (FBD, ST, LD)
- Operation modes:
  Automatic, Manual Step, Halted

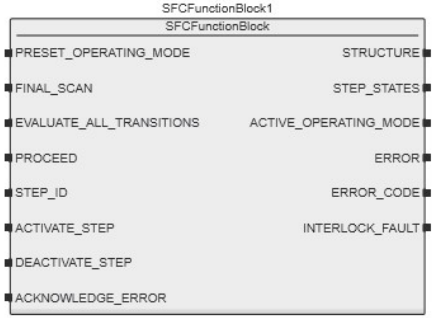


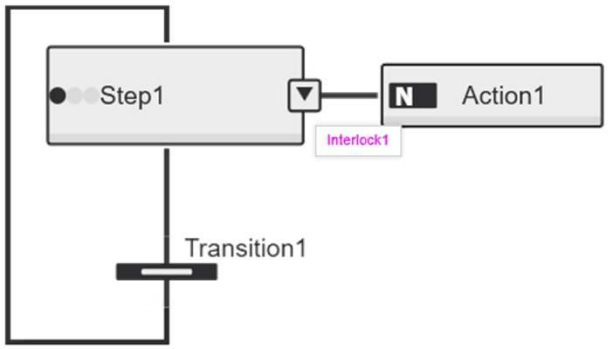
PLCnext Technology
Designed by PHOENIX CONTACT

Sequential Function Chart – SFC

- Compact SFC
- STEP Interlock
  can be used to control the execution of actions associated to a step
- Pre-Execute worksheet
- Post-Execute worksheet







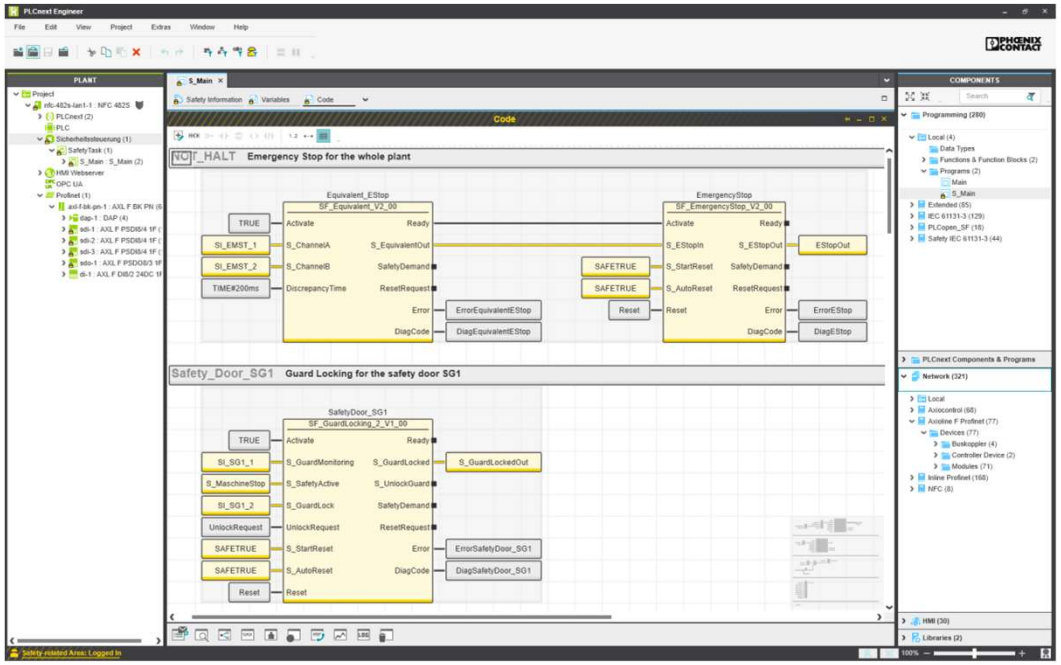
PHOENIX CONTACT
INSPIRING INNOVATIONS

PLCnext Engineer

Functional Safety Programming

Fully integrated Safety Programming

- TÜV Rheinland certified according to IEC 61508
- Editor with common behavior as known from standard FBD or LD editor
- Low Variability Language support
- Network granular CRC checksums
- PROFIsafe Support

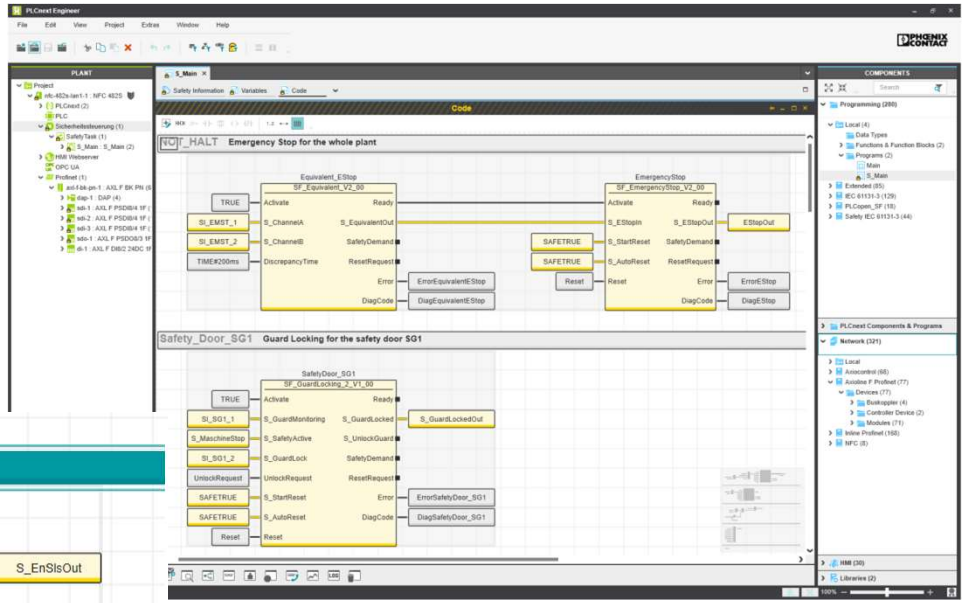


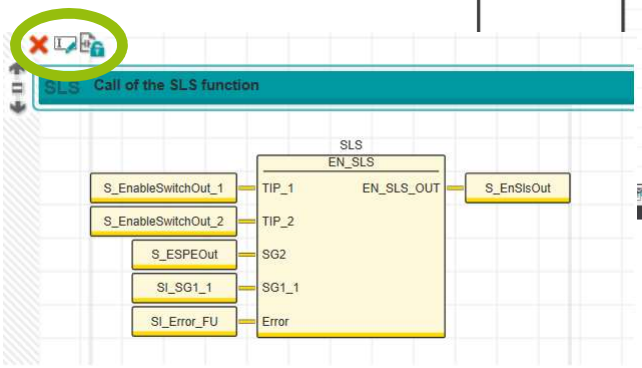
PLCnext Engineer

Functional Safety Programming

Fully integrated Safety Programming

- Individual safety functions can be protected by a verification function
- Background signal path analysis
- Background safe semantic analysis
- Diversely-redundant code generator



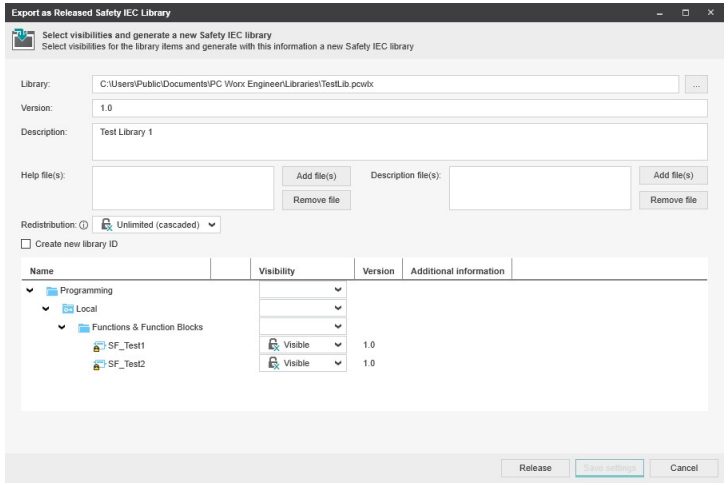


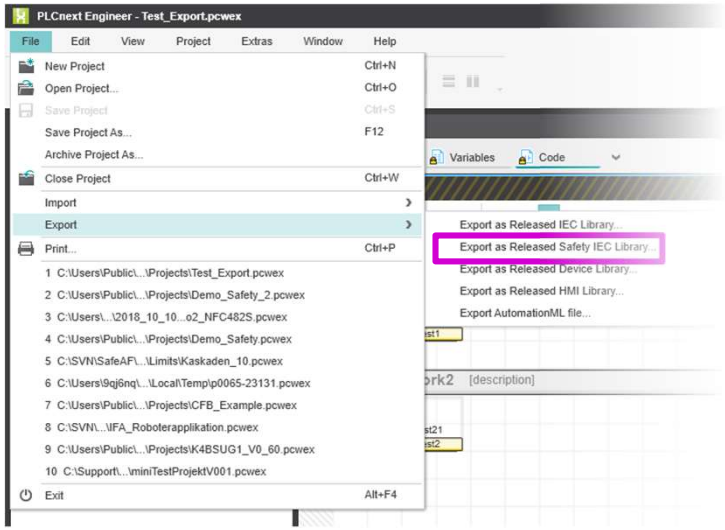
PLCnext Technology
Designed by PHOENIX CONTACT

PLCnext Engineer

Functional Safety User Libraries

- Export of safety-related function blocks as new user library





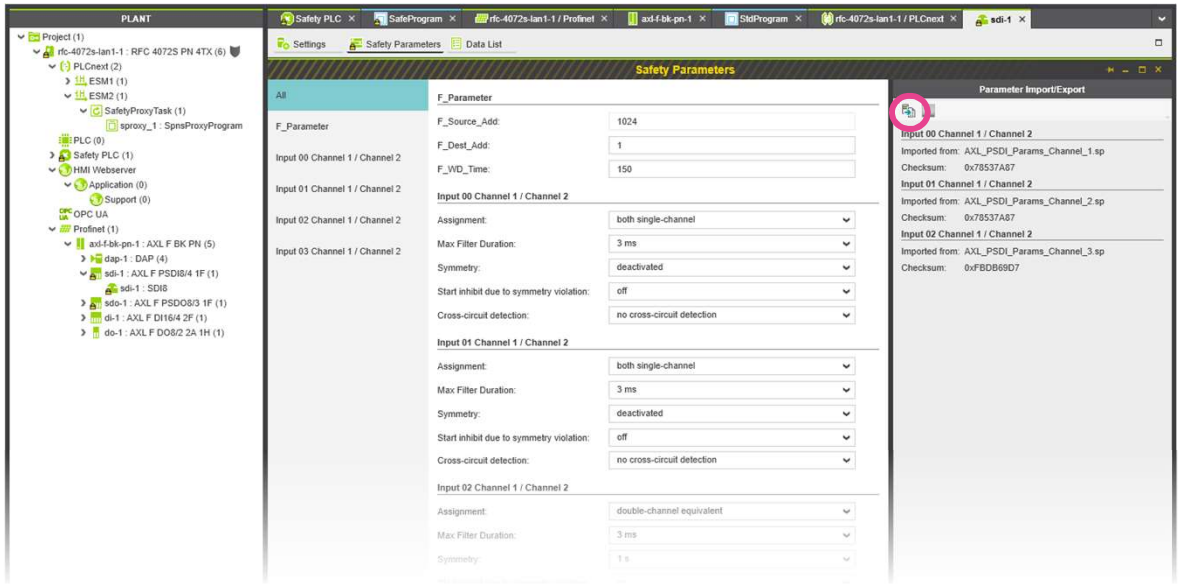
PHOENIX CONTACT
INSPIRING INNOVATIONS

PLCnext Technology
Designed by PHOENIX CONTACT

PLCnext Engineer

Safety Parameterization

- Parameterization for PROFIsafe devices
- Export / Import
  - Parameter sets of the whole device
  - Parameter sets of a single group



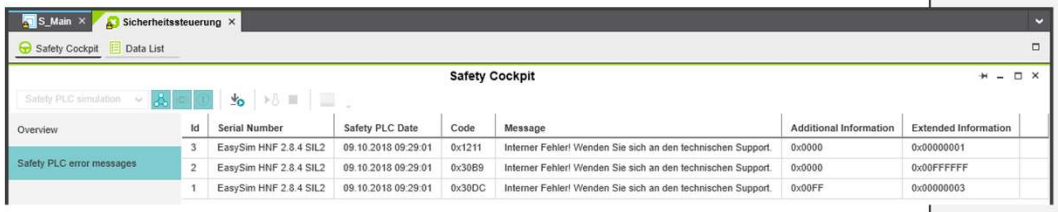
PHOENIX CONTACT
INSPIRING INNOVATIONS

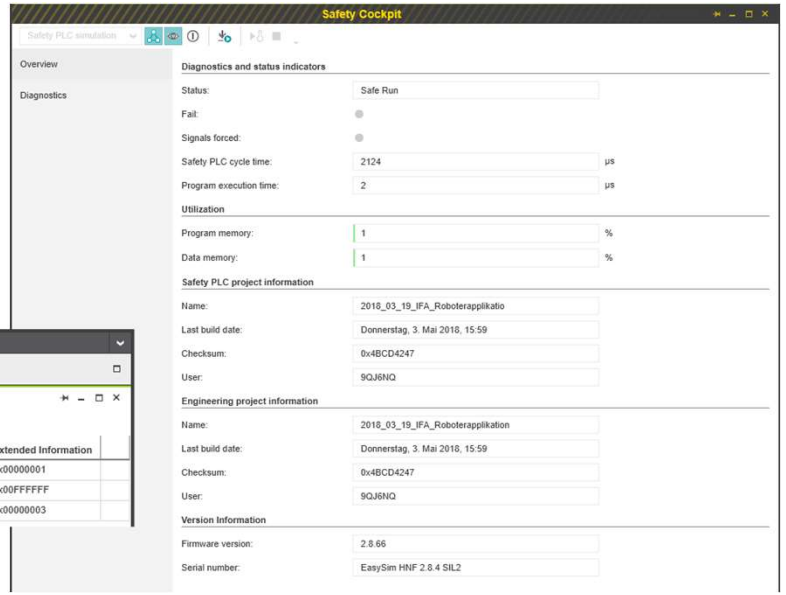
PLCnext Technology
Designed by PHOENIX CONTACT

PLCnext Engineer

Safety Cockpit

- Display the status information from the safety-related PLC
- Display the error messages from the safety-related PLC



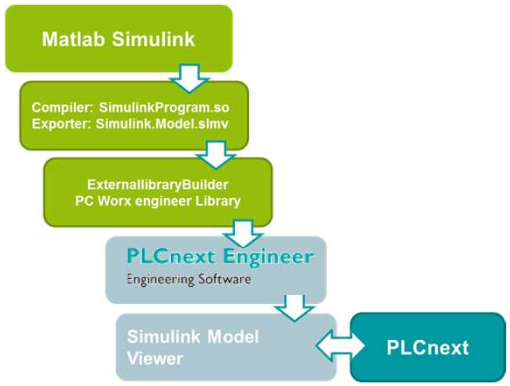


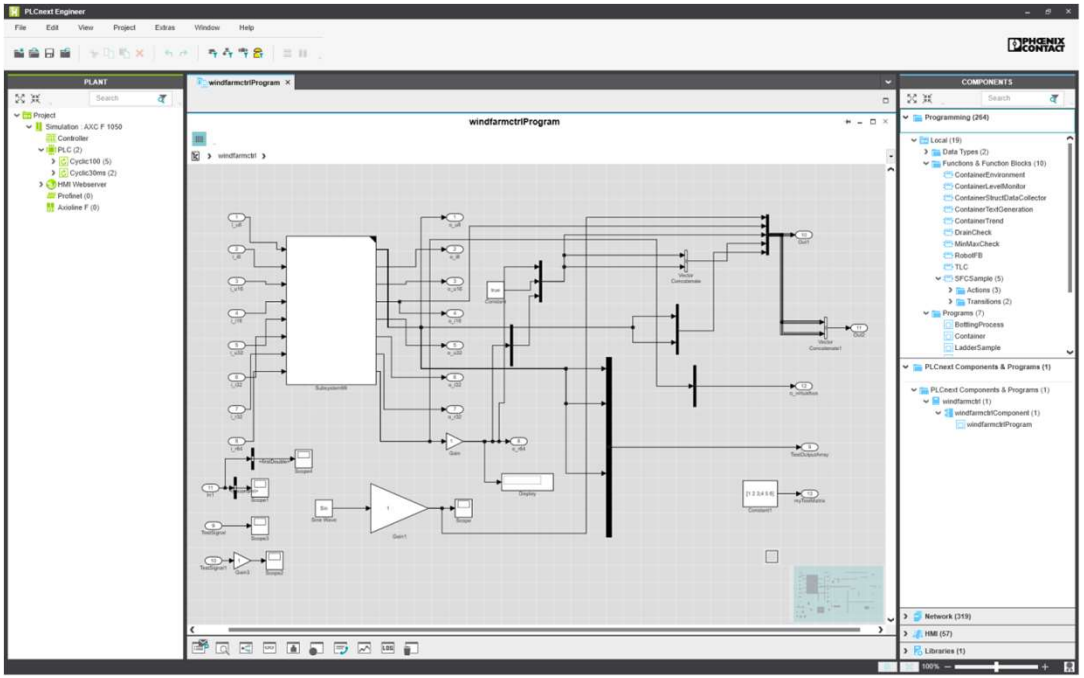
PHOENIX CONTACT
INSPIRING INNOVATIONS

PLCnext Engineer

Viewer for Simulink

- Model export as part of a PLCnext library
- Drill-down into sub-models
- Online-values for In- and Out-Ports

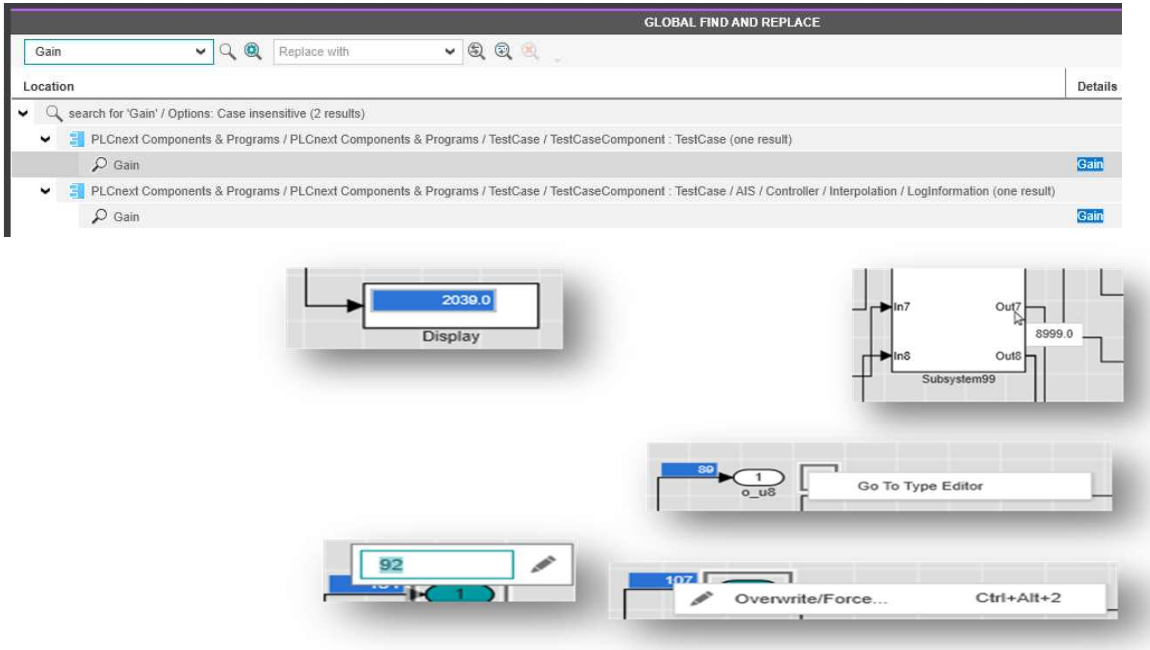




PLCnext Engineer 2019.0

Viewer for Simulink

- Global / Local Search
  - Jumpable objects selected
- Display block
  with online values
- Overwrite of GDS ports
- Jump to Type Model from Instance
- Online Indication on lines
  for boolean in /out ports

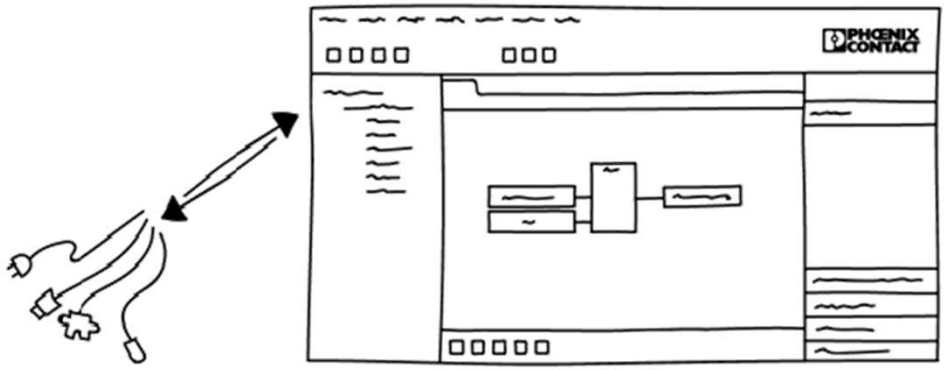


PLCnext Engineer

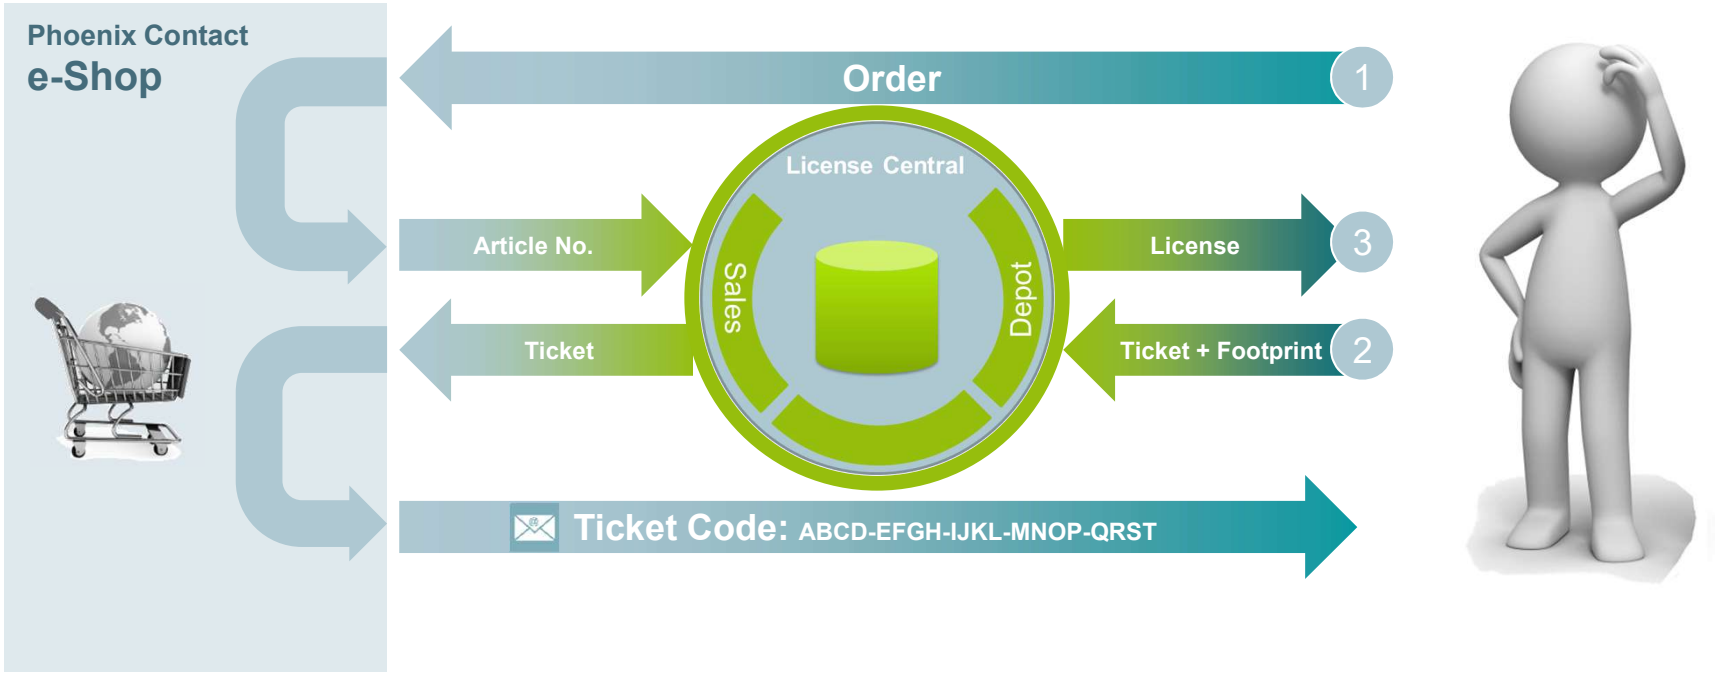
Application Control Interface (ACI)

Remote Control of the software:

- Application.BuildPath (property)
- Application.OpenProject (method)
- Application.ProjectOpened (event)
- Project.Close (method)
- Project.Save (method)
- Project.SaveAs (method)
- Project.Closed (event)
- ……



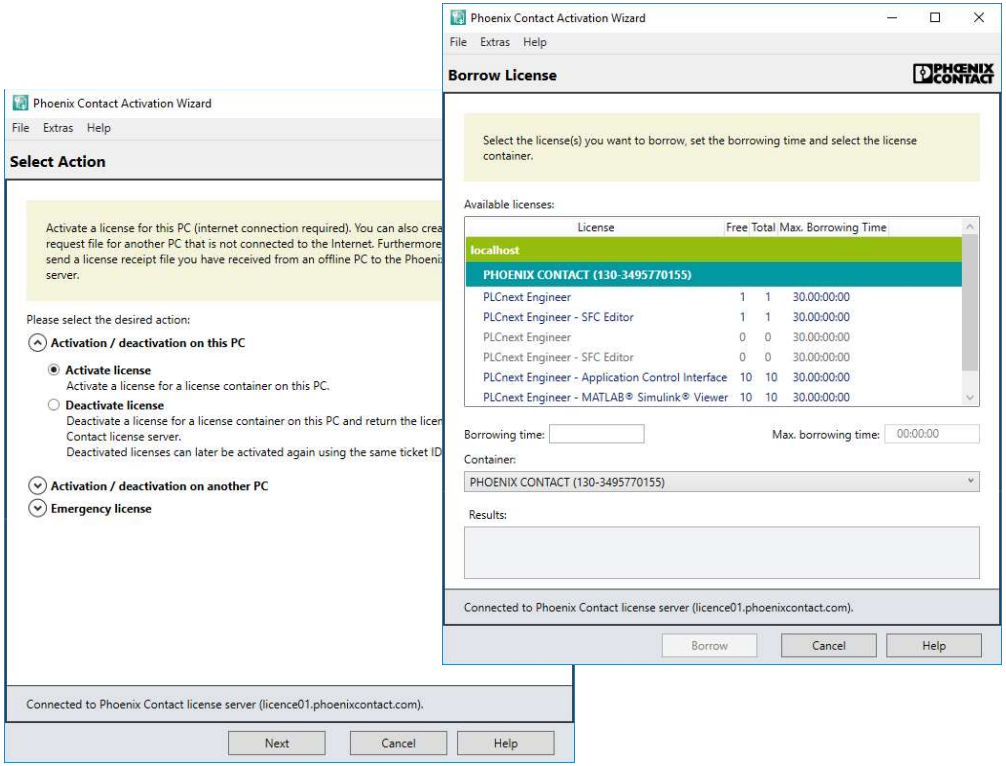
Software License Distribution



Licensing

Activation Wizard

- Version 1.1 HMI 2018
  - Deactivating / Moving licenses
- Version 1.2 SPS 2018
  - Network server for licenses
  - Server list; authentication
  - Borrowing of licenses
    (can be returned to pool)



PLCnext Engineer

Electronic Software License on USB A

PLCnext Technology
Designed by PHOENIX CONTACT

Software dongle - ESL STICK USB A - 1080084

CmDongle for saving licenses for various software products

Generate product PDF

current article

Add to product comparison | Add to part list | Add to shopping cart

Overview | Technical data | Downloads

Product Description

Up to 2000 licenses with different license models for various software tools can be stored on the license dongle.
Licenses can be used flexibly by moving the dongle from one computer to another.
Use of a license dongle is recommended when using virtual machines. This means that licenses can still be used after virtual machines are copied or even if settings are changed on the virtual machine.
Using the "Activation Wizard" software tool, activate and deactivate licenses on the license dongle. Or use the "Activation Wizard" to migrate licenses from a PC hard drive to a license dongle (or vice versa), for example.
No additional drivers are required to operate the dongle. After it is connected to a computer, it can immediately be used without administrator rights.

LTS Version

Wikipedia:

Long-term support (**LTS**) …
… is a product lifecycle management policy in which a stable release of computer software is maintained for a longer period of time than the standard edition. The term is typically reserved for open-source software, where it describes a software edition that is supported for months or years longer than the software's standard edition.
