

CUSTOM PACKAGING AND LABELING

Custom packaging options enable streamlined workflows for your applications

Packaging:

- Determined by dimensions
- Protective wrapping
- Corrugated paper
- Boxing

Labeling:

- Packages
- Final assemblies
- Individual components

OUR MISSION

At Phoenix Contact, our approach is innovative, sustainable, and based on partnership. Our customized product solutions help our customers across all industries develop sustainable applications with more efficient processes and reduced costs on the path to a smart world.

Phoenix Contact Product Solutions provides customized junction box, enclosure, and back panel products to meet a wide range of customer specifications and design requirements. These products and capabilities optimize organization and accessibility in your junction boxes, reducing assembly time, testing, and approvals, while simplifying the ordering process with a single part number. All junction box solutions are manufactured here in our U.S. facility for quick turnaround, from quote through production!
