

Re: Phoenix Contact (Ireland) Ltd. WEEE & Waste Battery Compliance

Dear Customer,

Phoenix Contact (Ireland) Ltd is a registered battery producer with the national registration body, The Producer Register Ltd.

Registration No.: **IE 01541 WB**

Phoenix Contact (Ireland) Ltd is also a member of WEEE Ireland (Registration ref. no. PHO300), an approved compliance scheme for the environmentally sound recycling of waste batteries.

As a responsible producer of batteries, Phoenix Contact encourages its customers to ensure that all waste batteries, in particular, those similar to the type Phoenix Contact (Ireland) Limited places on the market, are recycled according to sound environmental standards at the end of their useful lives.

Phoenix Contact is committed to meeting the requirements of the European Union (Waste Electrical and Electronic Equipment) Regulations 2014. These Regulations require producers of electrical and electronic equipment to finance the takeback of WEEE resulting from products that we place on the Irish market. This helps us to ensure that WEEE is reused or recycled safely. In line with that commitment Phoenix Contact will take back WEEE from you. Please contact us for details.

You also have a role to play in ensuring that WEEE is reused and recycled safely. So, if you choose not to return WEEE to us then you should not dispose of it in your bin. The crossed out wheeled-bin symbol on the product reminds users not to dispose WEEE in the bin. You should ensure that the WEEE is collected separately and sent for proper treatment. WEEE contains hazardous substances and if not managed and treated safely it can cause pollution and damage human health.

To ensure that best practice is followed in ensuring that Environmental legislation is adhered to we would be grateful if you could please assist us in providing the following information:

1. Please provide us with a copy of the procedure for the disposal of battery products and/or a copy of your Waste Management Plan for our records. Or alternatively advise details of the approved waste contractor that you use including their permit and license numbers.
2. Alternatively, should you not have any such arrangements currently in place, please see below a list of approved collection and recycling partners that WEEE Ireland have provided. Please contact them in due course to make arrangements for the disposal of end of life battery products from Phoenix Contact.
