

DIGITAL FACTORY *now*

The turbocharger of your investments

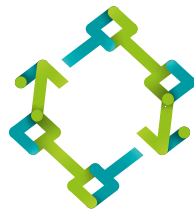

Discover now the potentials for your digital production of tomorrow. Ready-to-use solutions that have already been tested and validated now enable a smooth entry into the Digital Factory. Within just 18 months we were able to increase the productivity of our in-house production processes by more than 10%.

Our segments for increasing your productivity

Data collection

Efficient data processing and analysis

Data transportation

Smart and structured management of networks

Data usage

Standardized, time-saving horizontal and vertical machine integration

Data security

Up-to-date, holistic, and TÜV-certified cyber security concept

High transparency

With data from machines, the Digital Factory enables predictive maintenance and quick support.

Flexible infrastructure

Our solution can flexibly be adapted to every company size, every industry, and every production environment.

Proof of concept (PoC)

PoC has already been carried out in our in-house production facilities. We provide finished and tested use cases from concept to maintenance.
