

clipx ENGINEER 2.1

Release notes Change notes at a glance

Application note
111049_en_02

© Phoenix Contact 2024-05-28

1 Description

With the clipx ENGINEER engineering software, you can plan and order terminal strips, assembled mounting panels, and junction boxes. You can transfer the data to production.

i The document describes the changes between versions 2.0.13 and 2.1 of the clipx ENGINEER software from Phoenix Contact (phoenixcontact.com/product/1272241).

Table of contents

1	Description.....	1
2	New functions.....	2
2.1	Desktop version.....	2

3.3	Bend protection sleeves.....	8
4	New items in the product database.....	9

Observe these notes

i Make sure you always use the latest documentation. It can be downloaded at phoenixcontact.com/product/1272241.

2 New functions

2.1 Desktop version

With the clipx ENGINEER 2.1 version, a desktop version is available in addition to the browser version. You can install the desktop version on your local PC or on a network drive.

You can choose between one of the two versions or use both in parallel. The installation file for the desktop version can be downloaded via this link:

phoenixcontact.com/product/1272241

Please observe the restrictions when using the desktop version:

- No use of sample projects
- No saving of projects in the cloud
- No release of projects
- No use of configurators, e.g., functional engineering
- No transmission of ordering data

Use the web version to use these functions.

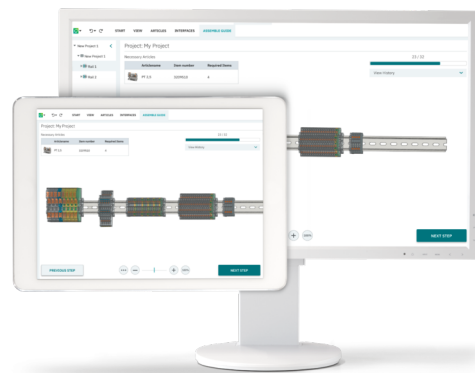

2.2 Terminal strip assembly with clipx ENGINEER assemble

As of version 2.1, it is possible to use the clipx ENGINEER assemble worker assistance software in clipx ENGINEER.

The worker assistance software transfers the data from the engineering process and then guides the user step-by-step through the assembly process of a terminal strip.

You can purchase clipx ENGINEER assemble as a chargeable add-on for extending the desktop version of clipx ENGINEER. Get in touch with your contact person at Phoenix Contact for this.

Figure 1 clipx ENGINEER assemble add-on

2.3 Interface to EPLAN Pro Panel

The interface between clipx ENGINEER and EPLAN Pro Panel has been overhauled. The interface is now based on the XML-based AutomationML data modeling language.

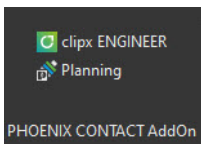

You can import a terminal strip that is mounted on a DIN rail directly from EPLAN Pro Panel. You can then add accessories to the terminal strip and export it back to the EPLAN application.

The required add-on must be installed separately. The installation file can be downloaded via this link:

phoenixcontact.com/product/1272241

After installation, the add-on is available in the EPLAN application. The data exchange can be started via the menu.

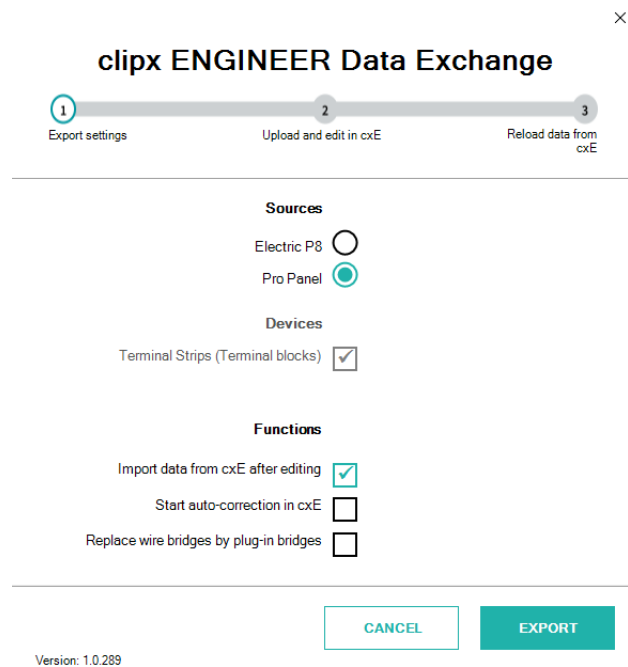

Figure 2 Add-on in EPLAN

Importing into clipx ENGINEER

When exchanging data, you can decide whether clipx ENGINEER should convert ECAD wire bridges to plug-in bridges. You can also start an auto-correction to add accessories, such as end caps, to a terminal strip.

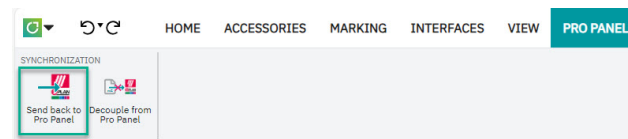

Figure 3 Importing into clipx ENGINEER

Exporting to EPLAN Pro Panel

After you have finished editing the terminal strip in clipx ENGINEER, you can transfer the project with all changes back to EPLAN Pro Panel.

Figure 4 Exporting to EPLAN Pro Panel

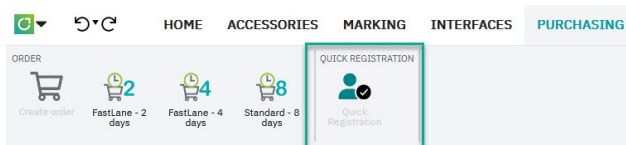

In this process, all items that are still missing are stored at the respective terminal points and transferred to the EPLAN Pro Panel bill of materials.

2.4 Quick registration without a customer account

You can order the project created in clipx ENGINEER via the Phoenix Contact website.

As a new Phoenix Contact customer without a customer account, you can use the quick registration option. This function is currently only available for logged-in customers in Germany.

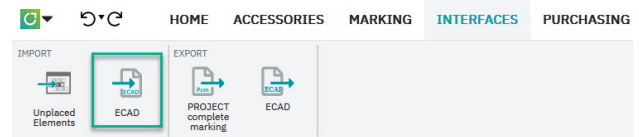

Figure 5 Quick registration without a customer account

2.5 Importing ECAD

On the “Interfaces” tab, you will find a new function for importing ECAD. This enables the connection of further programs, such as the CAE programs offered by Zuken or WSCAD.

Figure 6 Importing ECAD

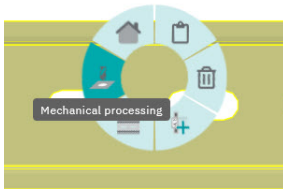

2.6 Mechanical processing of DIN rails

The “Mechanical Processing” function can be used to determine the length of the DIN rail and to add drill holes to a DIN rail.

Activate mechanical processing via the “Home” tab or the context menu of the DIN rail.

Figure 7 DIN rail context menu

After starting the mechanical processing, the following window appears.

Figure 8 Mechanical processing

MOUNTING RAIL - MECHANICAL ENGINEERING

Length

Length mm CHANGE LENGTH

Drill hole

Normal drill hole

Diameter mm PLACE

Long drill hole

Dimension mm

Orientation Horizontal Vertical PLACE

Placement

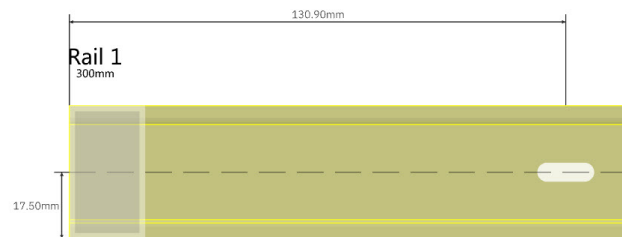

X Axis mm

Y Axis mm CHANGE PLACEMENT

To place a drill hole on a DIN rail, first select the DIN rail. You can then define the drill hole, the diameter, and the orientation.

For a precise placement, dimensional information is displayed.

Figure 9 Dimensional information

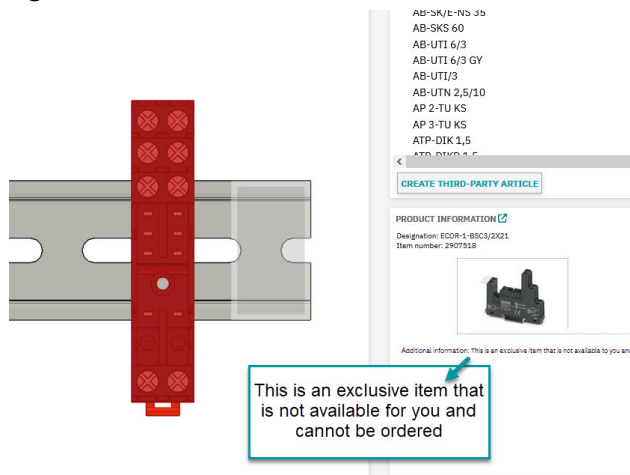

2.7 Exclusive items

Some Phoenix Contact items are only approved for a specific region. These items are displayed in the Insertion Center based on your location.

In addition, some items are only available for defined customers. If you open a project containing a customer-specific item, this item is marked in red.

In addition, you will receive a corresponding message in the product information.

Figure 10 Item cannot be ordered

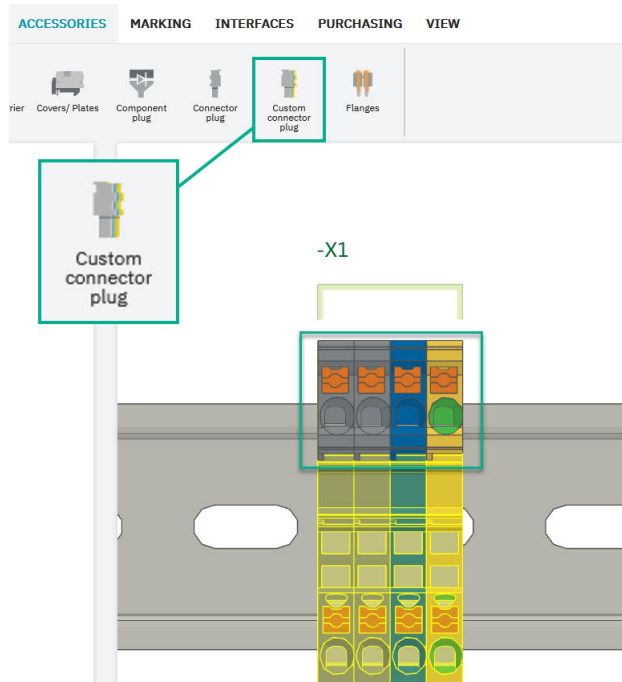

3 New accessories

3.1 Customer-specific plug-in terminal blocks

The terminal block area has been extended to include customer-specific plug-in terminal blocks.

Select the mode on the “Accessories” tab. clipx ENGINEER then places the plug-in terminal block automatically based on the terminal blocks. The customer-specific items appear in the corresponding color.

Figure 11 Custom connector plug

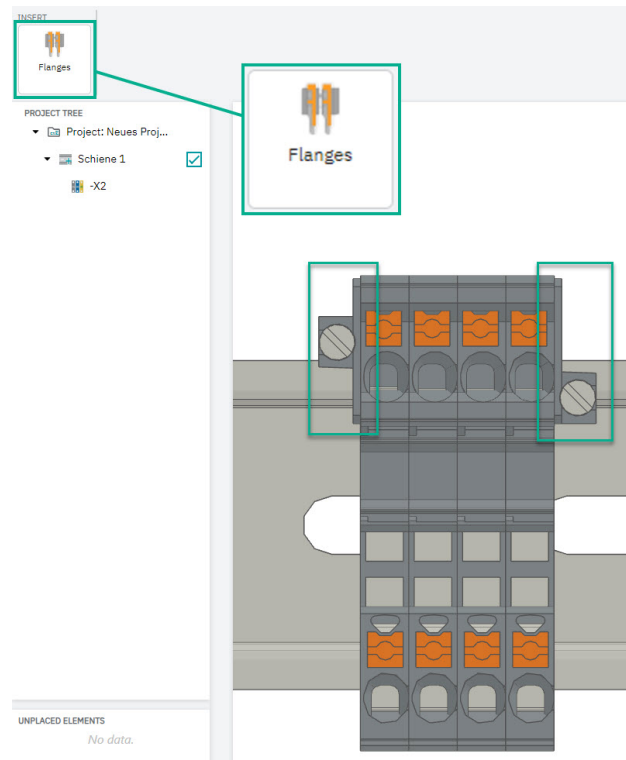

You will also receive the product information for the individually assembled module.

3.2 Flanges

In clipx ENGINEER 2.1, you can use flanges in the area of the plug-in terminal blocks.

Select a compatible plug-in terminal block in the workspace and open the corresponding mode on the “Accessories” tab.

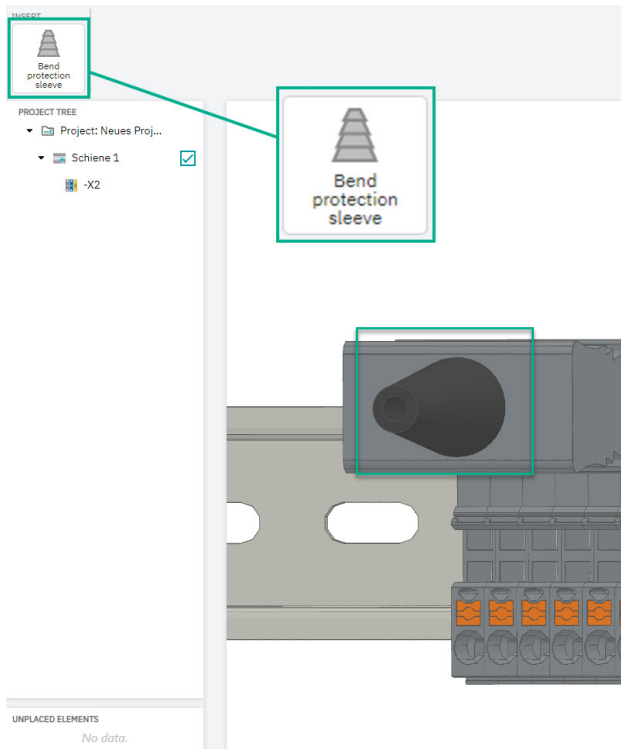

Figure 12 Flanges

3.3 Bend protection sleeves

Bend protection sleeves have also been added as accessories. You can now place bend protection sleeves on cable housings in the area of the plug-in terminal blocks.

Figure 13 Bend protection sleeve

Contact our team

4 New items in the product database

In clipx ENGINEER, you have access to an extensive product database from Phoenix Contact with items for control cabinet solutions.

The following table lists the newly added items in version 2.1 compared to version 2.0.13.
