

HEAVYCON complete heavy-duty connectors

Compatible insertion – Flexible combinations

The right connector for every application with HEAVYCON complete

Heavy-duty connectors from the HEAVYCON complete series protect your interfaces and ensure secure power, data, and signal transmission even under the harshest conditions. They are resistant to dirt, water, vibrations, and high mechanical strain and remain sealed up to IP69K degree of protection. You can always create the right plug-in connection for your requirements with housings from our three series types and matching contact inserts which can be combined.

HEAVYCON STANDARD – Proven versatility

STANDARD housings are distinguished by a wide range of robust metal housings with various cable outlet directions and locking mechanisms.

- High corrosion resistance
- Flexible single or double locking latches
- Mounting and plug-in compatible
- IP66/IP67

Metal housings are EMC-ready

Thanks to conductive surfaces and seals, all HEAVYCON metal housings are EMC-ready. Combined with shielded cable glands, they offer you reliable protection in electromagnetic environments.

HEAVYCON EVO – Ingenious flexibility

The flexibly swiveling bayonet locking of the EVO series allows you to adjust the cable outlet direction on site.

- Free selection of cable outlet direction
- Lower logistics costs
- Flexible single or double locking latches
- Mounting and plug-in compatible

HEAVYCON ADVANCE – Robust without compromise

ADVANCE housings are particularly durable and robust, thanks to direct screw locking without panel mounting base.

- Ideal for increased environmental requirements, thanks to high degree of protection
- Cost advantage, thanks to direct mounting
- Mounting compatible
- IP68 / IP69K

Configure and order heavy-duty connectors online

The new HEAVYCON online configurator provides you with ideal support for designing your tailor-made connector. Select from a very wide range of combination possibilities. The configurator will only recommend parts suitable for the selected components.

Thanks to simple filter menus, 2D and 3D product images, as well as an intuitive user interface, you can configure your connectors in just a few steps – without errors. You can add your solution to the shopping cart and place your order immediately.

Your advantages

- Convenient configuration with just a few entries
- Intuitive operation, thanks to drag-and-drop
- Custom combination in accordance with your specific requirements
- User-friendly visualization, thanks to real-time 3D representation of your configuration
- Easy planning, thanks to 2D or 3D data that you can import into your CAD software

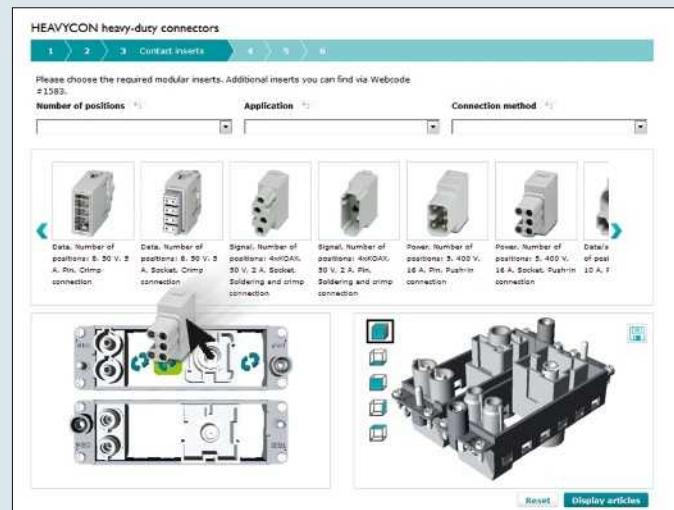

Online configurator for heavy-duty connectors

Image representations simplify selection

Simply drag the components to the desired position using the drag-and-drop function, and the configurator automatically updates the preview.

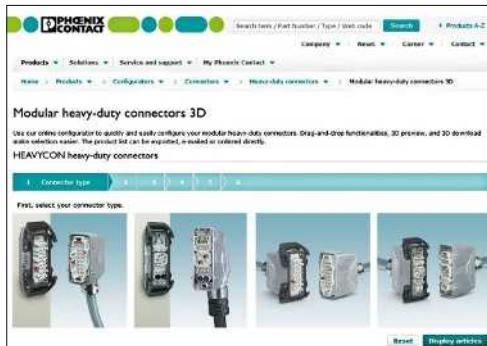

Quick access to the configurator for heavy-duty connectors: simply enter the web code into the search field on our website.

 Web code: #1708

The screenshot shows the HEAVYCON heavy-duty connectors configurator interface. At the top, there's a navigation bar with steps 1 through 8, currently at step 3: Contact inserts. Below it is a search bar with the placeholder "Please choose the required modular inserts. Additional inserts you can find via Webcode: #13885." There are dropdown menus for "Number of positions" and "Application". A "Connection method" section shows two examples: "Data, Number of positions: 8, 50 V, 2 A, Pln, Crimp connection" and "Power, Number of positions: 3, 400 V, 26 A, Pln, Push-in connection". On the right, there's a "Details of seal" section for "Power, Number of positions: 16 A, Seal, Push-in connection". The main area displays a grid of connector components and a large 3D preview on the right showing a complex assembly of connectors and wires. Buttons at the bottom right include "Reset" and "Display articles".

The desired connector in just a few steps

The screenshot shows the Phoenix Contact website's modular heavy-duty connectors 3D configurator. It features a search bar and a "Search" button. Below the search bar, there are dropdown menus for "Products", "Solutions", "Service and support", and "My Phoenix Contact". The main content area is titled "Modular heavy-duty connectors 3D" and includes a sub-section "HEAVYCON heavy-duty connectors". It shows a grid of connector types and a large 3D preview on the right. Buttons at the bottom include "Reset" and "Display articles".

1. Select connector type

First of all, state the connector type.

HEAVYCON complete features housings for all applications.

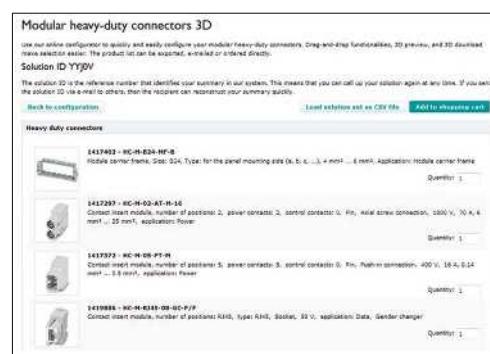

3. Download the CAD data

Integrate the fully configured solution into your CAD system.

2. Combine inserts

Select the appropriate fixed position and modular contact inserts for the transmission of data, signals, power or pneumatic applications in accordance with your requirements.

The screenshot shows the configuration details for a selected connector. It includes a "Back to configuration" link, a "Heavy-duty connectors" section, and a table of selected inserts. The table lists four items:

Solution ID	Description	Quantity
1417403 - HC-H-824-MF-R	Module center frame, Gehr, SDA, Type: for the panel mounting pins (x, 5, 1, ...), + incl., 6 mm, Application: Module center frame	Quantity: 1
1417297 - HC-H-02-AT-H-16	Connect insert module, number of positions: 1, power contacts: 2, control contacts: 0, Pln, axial crimp connection, 2000 V, 70 A, 4 mm², height: 22 mm, application: Power	Quantity: 1
1417372 - HC-H-08-PT-H	Connect insert module, number of positions: 1, power contacts: 3, control contacts: 0, Pln, Push-in connection, 400 V, 16 A, 0.14 mm², height: 8.5 mm, application: Power	Quantity: 1
1417098 - HC-H-021-03-02-P/F	Connect insert module, number of positions: 10, type: KHL, Solder, 55 V, application: Data, gender changer	Quantity: 1

4. Order the configuration

The product list can be exported, processed further or ordered directly. You can call up the configuration again at any time via the generated solution ID.

Flexible even under the harshest operating conditions

Heavy-duty connectors are established on the market and used in applications where robust Plug and Play solutions are required. Combine virtually every plug-in connection with the HEAVYCON complete product range – optimally tailored to your space requirements and assembly outlay.

In wind turbines, groups of cables and lines are connected using connectors, for example. The interfaces must be resistant to corrosion, robust and as lightweight as possible. This is where the HEAVYCON EVO series comes into its own.

Robust and quickly set up in the production line:
HEAVYCON STANDARD

Flexible in machine building and systems manufacturing: **HEAVYCON EVO** with modular inserts

Free combination is your competitive advantage

The HEAVYCON complete product range

The entire HEAVYCON complete product range consists of metal and plastic housings, contact inserts, cable glands, and accessories.

All housing series fit on standard panel cutouts. STANDARD and EVO housings require a panel mounting base for the panel feed-through. ADVANCE housings can be mounted directly onto the wall using the panel mounting flange.

The sleeve housings, panel mounting bases, surface mounting housings, and coupling housings can be freely combined with one another within the STANDARD and EVO series. They are mounting and plug-in compatible with aluminum housings from well-known manufacturers. This allows all components to be individually combined and flexibly modified, extended, or replaced.

Our fixed position and modular contact inserts naturally fit into all housing series.

HEAVYCON complete			
	HEAVYCON STANDARD	HEAVYCON EVO	
Sleeve housing	A rectangular metal sleeve housing and a cylindrical metal cable gland.	A black plastic sleeve housing, a silver metal sleeve housing, and a cylindrical metal cable gland.	A black plastic sleeve housing and a silver metal sleeve housing.
Contact inserts	A fixed position contact insert. Fixed number of positions	A modular contact insert. Modular	
Panel mounting bases	A panel mounting base for the STANDARD series.	A panel mounting base for the EVO series.	A panel mounting flange for the ADVANCE series.

HEAVYCON STANDARD – Proven versatility

HEAVYCON STANDARD housings with fast and reliable locking latch are suitable for many applications. The robust metal housings resist dirt, water, vibrations, and high mechanical strain.

HEAVYCON STANDARD and EVO housings are equipped with single or double locking latches. Various supporting base elements such as panel mounting bases, surface mounting housings or coupling housings are available depending on the application.

 Web code: #0517

STANDARD housings

The robust STANDARD metal housings are available with various cable outlet directions and locking mechanisms in the B and D series.

Compact D7 size

With the metal or plastic D7 connectors, you can transmit signals and power even where space is limited. They are suitable for square contact inserts.

Various outlet directions

Select from our wide housing range according to your requirements. We offer you sleeve housings with straight or lateral cable outlet for all common metric and Pg thread sizes.

Proven product range

The STANDARD housings are available in market-standard sizes and are fully compatible with the industry standard.

Convenient locking latch

The locking latch can be manually pressed quickly and easily. Housings with single locking latch are ideal for lengthwise alignment. Double locking latches can be installed sideways to save space.

EMC protection

The housing surfaces and seals are electrically conductive. Combined with shielded cable glands, they offer you reliable EMC protection.

For the harshest operating conditions

The metal housings are made from particularly corrosion-resistant die-cast aluminum, which is resistant to aggressive industrial conditions and high mechanical loads. They are reliably sealed up to IP67 degree of protection.

HEAVYCON EVO – Ingenious flexibility

Switch to HEAVYCON EVO now and save on material and storage costs. The unique swivel cable gland with bayonet locking replaces up to eight types of standard sleeve housings. Thanks to the angled outlet, both outlet directions can be used conveniently.

The use of high-quality materials and full compatibility with the industry standard enable failsafe performance in a wide range of applications.

 Web code: #0518

EVO housings

The flexible EVO housings are available in the B and D series. Depending on the application, select a cost-effective plastic housing or an EMC-compatible metal housing.

Flexible even where installation space is tight

The plastic M1 single module housings accommodate modular contact inserts thus providing extremely compact interfaces.

Two outlet directions

Thanks to the flexible bayonet locking, you can determine the cable outlet direction on site and subsequently change it, if required. You have the choice of a straight or side outlet.

Flexible connection in moments

The cable gland, which is separate from the housing, is securely locked in place in moments and without the need for special tools, thanks to the bayonet locking.

Reduced number of versions

HEAVYCON EVO housings reduce the number of versions, and therefore your warehousing costs, by up to 70%. Using just one housing type and four cable glands, you can implement solutions for every possible application.

EMC protection

The housing surfaces and seals of the metal series are electrically conductive. Combined with shielded cable glands, they offer you reliable EMC protection.

For harsh conditions

EVO connectors are tested for use in various industrial applications. The fiberglass-reinforced polyamide plastic housings satisfy the requirements for IP66 degree of protection, and the metal housings satisfy IP66/IP67.

HEAVYCON ADVANCE – Robust without compromise

HEAVYCON ADVANCE heavy-duty connectors with screw locking are ideally suited for particularly aggressive surroundings, e.g., in offshore areas, the chemical or railway industry. Sensitive interfaces are reliably protected, even against EMC influences.

For the panel feed-through, the panel mounting base that is normally used has been replaced by two simple panel mounting flanges, thereby reducing mounting and material costs. With this method, the sleeve housing forms a seal directly on the control cabinet panel.

 Web code: #0519

ADVANCE housings

HEAVYCON ADVANCE is available in metal and plastic versions. The powder-coated outdoor housing is suitable for meeting extreme demands.

Robust screw locking

Mount the ADVANCE sleeve housing with two panel mounting flanges and robust stainless steel locking screws directly onto the wall. This achieves a high degree of tightness and makes it more difficult for unauthorized persons to gain access.

Save space without panel mounting bases

With HEAVYCON ADVANCE, you eliminate the need for the normal panel mounting base on the device side. The housings are therefore particularly durable, robust, and save space.

**Save space and
reduce costs**

ADVANCE housings
do not need a panel
mounting base on the
device side.

Cost-efficient designs

Without the need for the normal panel mounting base, you save on mounting and material costs. The low designs of the metal and molded cable glands of the plastic housings offer further savings potential.

EMC protection

The housing surfaces and seals of the metal series are electrically conductive. Combined with shielded cable glands, they offer you reliable EMC protection.

For aggressive ambient conditions

Thanks to the special powder coating and UV-resistant seals, the ADVANCE housings are ideal for use under extreme outdoor conditions.

HEAVYCON complete – Quality in every application

The quality of our products is our top priority. We do not just test the quality of finished products, we are aware of our responsibility and perform testing during every step of the development process.

A process-oriented, integrated management system ensures that not only legislation and standards, but also customer requirements are taken into account during the manufacturing of our products.

HEAVYCON connectors are tested in accordance with numerous national and international standards and are suitable for many applications.

IP and NEMA degrees of protection DIN EN 60529, NEMA 250

On HEAVYCON connectors, no visible dust or water ingress can be detected within the housing. The contact inserts are well protected.

Vibration IEC 60068-2-6

HEAVYCON connectors fulfill the requirements of the vibration test and are therefore ideal for applications on construction vehicles and machinery.

Temperature shock IEC 60512-11-4, test 11d

HEAVYCON connectors are suitable for applications in ambient temperatures of between -40°C to +125°C with constant temperature behavior.

IK09 shock resistance IEC 62262

HEAVYCON plastic connectors with IK09 are shock resistant to a similar degree as aluminum connectors or control boxes.

Roll-over in accordance with DIN IEC 62196-1

HEAVYCON plastic housings withstand high stress levels from heavy, moving loads without any adverse effect on the function.

Dynamic load HEAVYCON EVO special test

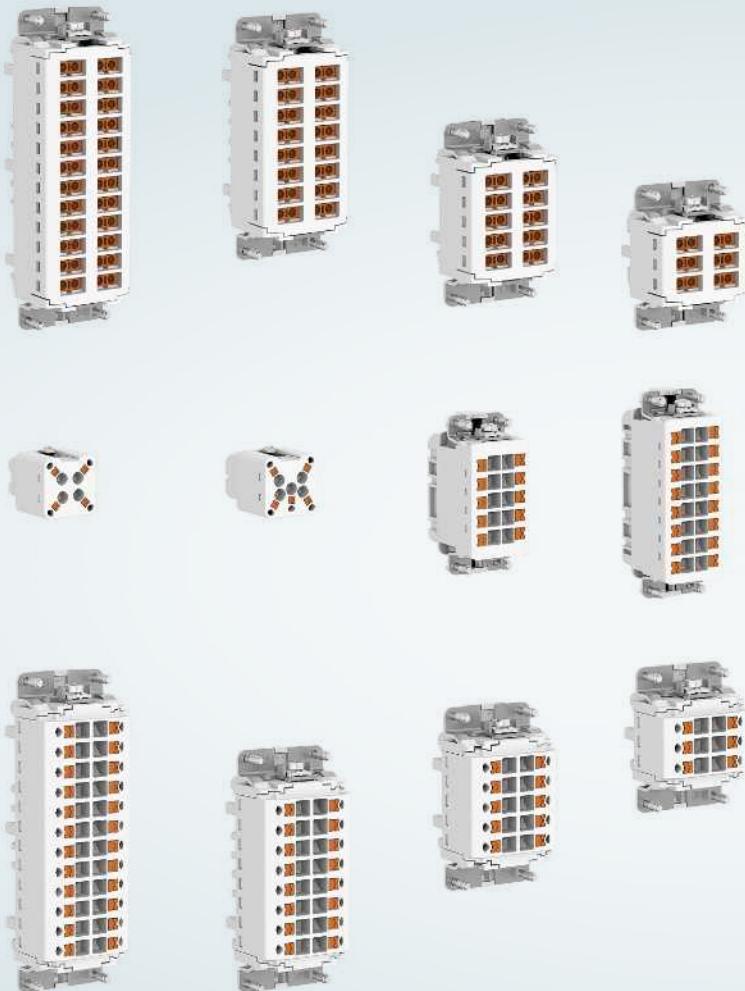

This test verifies that the HEAVYCON EVO bayonet locking and the double locking latch do not open independently or malfunction even in the case of extremely static loads.

Contact inserts with a fixed number of positions – The right connection technology for every application

Our contact inserts offer you consistently compatible interfaces, which can be flexibly combined, for all conventional sizes.

The fixed-position versions are available – even for mixed assembly – in a variety of performance classes and with a variety of connection technologies. Fast connection technologies such as Push-in or QUICKON insulation displacement connection make it possible to connect cables in seconds.

 Web code: #0516

Push-in Technology

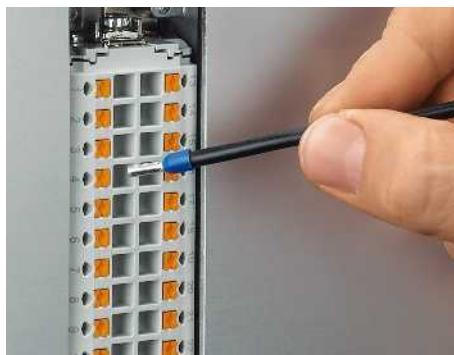

Designed by PHOENIX CONTACT

Your advantages

- Comprehensive range with the right Push-in insert for every size
- Easy, tool-free installation with Push-in connection
- Connection-compatible with other connection technologies, such as crimp connection

Easily connect, code, and mount contact inserts

User-friendly Push-in connection

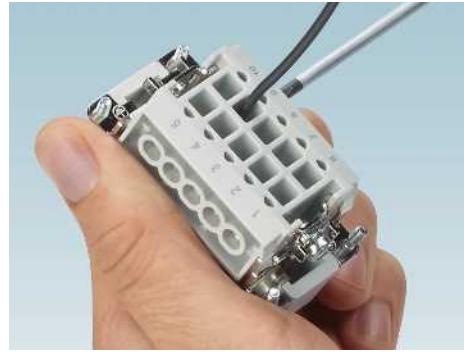

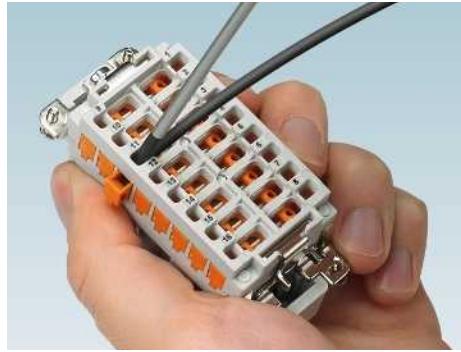

Contact inserts with Push-in connection provide easy handling, extremely short connection time, and a secure connection.

Easy installation

Contact inserts with Push-in connection technology allow you to make connections quickly and easily, even for components already installed in a control cabinet.

For high packing density

We provide Push-in inserts with a compact terminal chamber for high-position applications and modules with double conductor connections.

Fast QUICKON connection

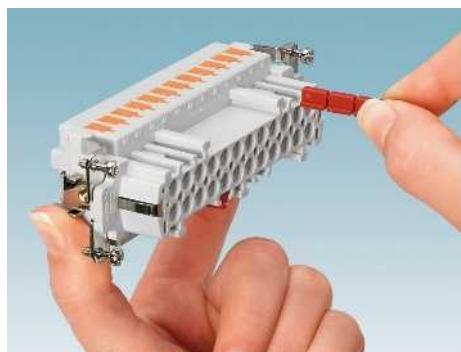

Reduce wiring times by up to 60%. With the QUICKON connection, you can connect stranded and solid conductors without preparation work.

Compact crimp connection

Contact inserts with crimp connection need very little space at the terminal point.

Universal screw connection

Satisfy the highest demands with the maintenance-free screw connection. The conductor connection is gas-tight and permanent.

Cost-effective coding

The coding with plastic profiles will prevent you from mismatching identical, adjacent connectors.

Tools

Mechanical crimping pliers can be used to crimp all types of contact reliably and effortlessly. Unlocking tools are available for removal.

Portable hand-held device

You can strip conductors and crimp ferrules in less than two seconds using the Crimphandy portable hand-held device.

Modular contact inserts – Everything in one housing

Combine the appropriate modules for your application from our wide range of products: the HEAVYCON modular range includes over 50 contact inserts for power, signal, and data transmission, and for pneumatic applications.

The innovative snap-in frame with sturdy catch springs enables quick mounting. It fits in all housings of the HEAVYCON STANDARD, EVO, and ADVANCE series. Modules and frames are compatible with the market standard.

i Web code: #0516

Easy to snap into place

Mount any module combination quickly and easily with the innovative snap-in frame. Snap the contact inserts into place – job done. Springs on the side accommodate the modules and securely hold them in position.

Your advantages

- Highly compact interface, thanks to the combination of a wide range of transmission media in one housing
- Reduce installation time by 40%, thanks to the innovative snap-in frame with latch springs
- Safe, thanks to touch proofness and leading PE contact
- Fully compatible with the industry standard

Push-in Technology

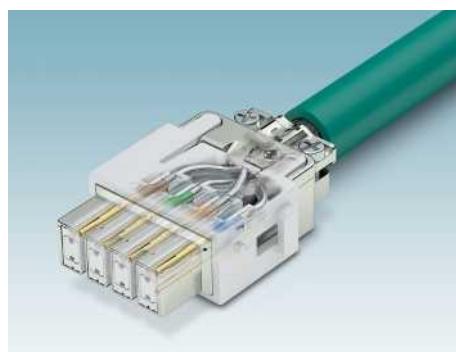

Designed by PHOENIX CONTACT

The right connector for every application, thanks to the comprehensive range of contact inserts.

Data transmission via RJ45

You can integrate RJ45 data cables easily into your application with the RJ45 modules. We also offer pre-assembled patch cables which are immediately ready for use.

High-speed data transfer

With our gigabit modules featuring 360° shielding and contacts shielded in pairs, you can transmit data quickly and securely for high-speed applications.

Easy contacting

Direct insertion without any tools: contact inserts with Push-in connection provide a convenient conductor connection resistant to vibrations.

Mounting the EVO M1 single-module housing

 Web code: #1850

Single-module housing

The EVO M1 housing has space for one modular contact insert.

Assemble the sleeve housing

Push the cable gland and sleeve housing onto the cable.

Insert the contact insert

The assembled contact insert can only be inserted in one direction. Incorrect plugging is therefore ruled out.

Attach the contact insert

Screw in the contact insert using the screws provided.

Assemble the panel mounting base

Insert the contact insert into the panel mounting base.

Attach the contact insert

Screw in the contact insert using the screws provided.

Attach the flat gasket

Position the flat gasket on the panel mounting base and secure it.

Plug the sleeve housing

Plug the sleeve housing into the panel mounting base and close using the locking latch.

Flexible cable outlet

Position the cable gland in the desired direction and secure it.

Crimp contacts

Housing material		Cast aluminum, corrosion resistant				Cast aluminum, corrosion resistant					
Surface material		Conductive				Conductive					
Lock material		Polyamide				Polyamide					
Seal material		NBR, conductive				NBR, conductive					
Ambient temperature (operation)		-40°C ... +125°C				-40°C ... +125°C					
Degree of protection (when plugged in)		IP66/IP67 NEMA 4X				IP66/IP67 NEMA 4X					

Mounting the EVO housing

Assemble the sleeve housing

Push the cable gland and sleeve housing onto the cable.

Insert the contact insert

Connect the pre-assembled contact insert to the panel mounting side and screw it tight.

Attach the flat gasket

Position the flat gasket on the panel mounting base and mount it on the control cabinet panel.

Insert the contact insert

Connect the contact insert to the panel mounting side and screw it tight.

Attach sleeve housing

Plug the corresponding sleeve housing into the panel mounting base.

Locking latch

Close the locking latch.

Straight cable outlet

The cable outlet direction can also be changed on site.

Turn the cable gland

Loosen nut and turn the cable gland.

Lateral cable outlet

Position the cable gland in the desired direction and secure it.

Further information

Accessories

You will find a comprehensive listing of accessories and replacement parts for advanced installation options and repairs for our complete HEAVYCON product range under:

i Web code: #0521

You will find our wide range of crimping tool and ferrule products under:

i Web code: #0544

CES cable entry system

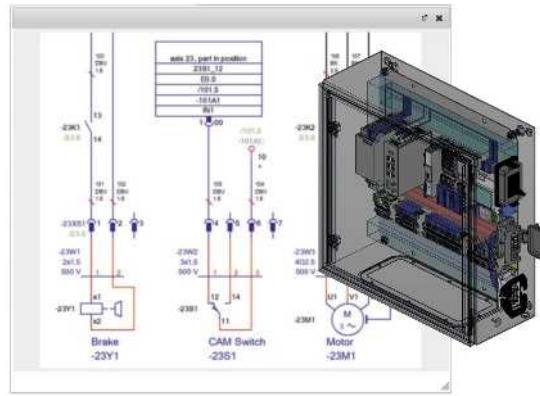

Cables can be clearly and systematically routed into the control cabinet with the CES modular cable entry system. Flexibly combinable cable sleeves can be mounted and replaced quickly. The cable sleeves are available in various shapes and diameters. They are particularly robust, and provide a reliable seal with protection class IP54.

i Web code: #0570

EPLAN data including 3D models

If you need the latest EPLAN data in the format for EPLAN Electric P8 Version 2.x, you can call these up directly on our website under Service and Support / EPLAN-P8-Data Manager. You will receive the product data in XML format for import into the product management system, product photos, 3D models, and macros. Naturally, this data is also available in the EPLAN Data Portal.

DIN rail mounting frame

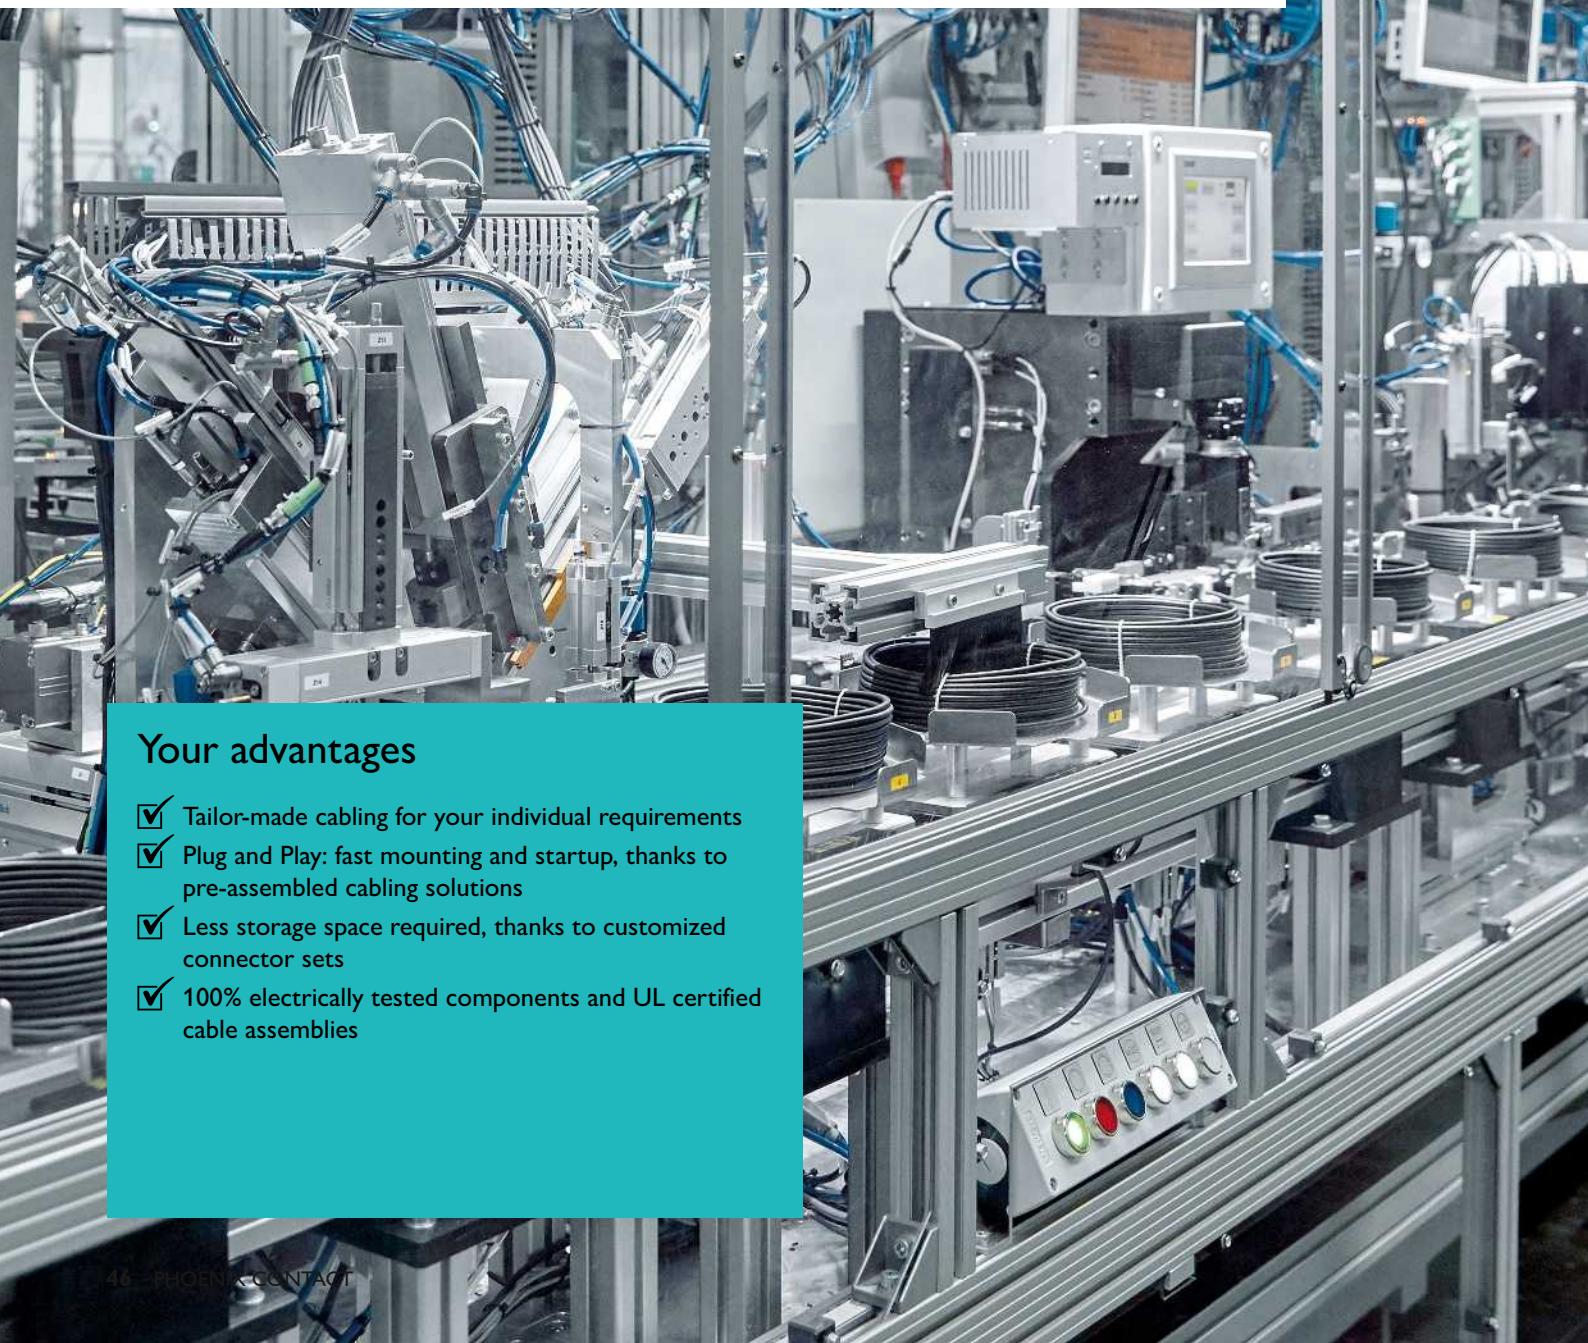

The new HC-CIF DIN rail mounting frames can be used to install pre-assembled contact inserts quickly and easily directly on the DIN rail in the control cabinet. Made from robust high-performance plastic, the frames are stable, very light, and also accommodate plastic sleeve housings from the HEAVYCON EVO B series of connectors.

From the initial idea to the tailor-made solution

Your special applications also require special solutions. The Service Center for industrial connectors from Phoenix Contact caters to your requirements, from a small customization to a completely new product development. You can count on us: we will work with you at every stage of the project to develop your custom cabling solution. With our extensive technology and product expertise, we transform your requirements into a tailor-made product in just a few days.

Your advantages

- Tailor-made cabling for your individual requirements
- Plug and Play: fast mounting and startup, thanks to pre-assembled cabling solutions
- Less storage space required, thanks to customized connector sets
- 100% electrically tested components and UL certified cable assemblies

Our range of services for your individual cabling

Modified cable outlets

We offer you connectors with cable outlets that are tailor-made to your requirements by modifying our standard housings.

Customized sets

Should you always need the same connector configuration for series machines or service tasks, we will gladly put together the matching set for you under an order number.

Web code: #0523

Assembled housings

We provide sleeve housings and panel mounting bases for heavy-duty connectors assembled and wired in accordance with your specifications. Simply mount and wire in the cabinet – and your interface is ready.

Clearly marked

We mark in accordance with your requirements – whether cable or wire marking for different mounting types, or directly printed cables, and as brand labeling.

In dialog with customers and partners worldwide

Phoenix Contact is a globally present, Germany-based market leader. Our group is synonym for future-oriented components, systems, and solutions in the fields of electrical engineering, electronics, and automation. A global network across more than 100 countries, and 16,500 employees ensure a close proximity to our customers, which we believe is particularly important.

The wide variety of our innovative products makes it easy for our customers to find future-oriented solutions for different applications and industries. We especially focus on the fields of energy, infrastructure, process and factory automation.
