PHOENIX CONTACT DIALOG DAYS
AGENDA

Edition HANNOVER MESSE

APRIL 13
TUESDAY

10:00 am	Application Examples from Additive Manufacturing: Inductors, Coolers and much more
11:00 am	From Digital Twin to Real Component: the Protiq Platform
Noon	Single Pair Ethernet More than just new connectors
01:00 pm	Application Examples from Additive Manufacturing: Inductors, Coolers and much more
02:00 pm	The All Electric Society enabled by Power-to-X
03:00 pm	From Digital Twin to Real Component: the Protiq Platform
04:00 pm	Single Pair Ethernet More than just new connectors
05:00 pm	The All Electric Society enabled by Power-to-X

APRIL 14
WEDNESDAY

07:00 am	Paths to a sustainable industrial transformation - Empowering the All Electric Society
07:30 am	Energy storage – the foundation for successful electrification in the All Electric Society
08:00 am	Connectors and cables - the nervous system for energy storage systems
08:30 am	5G under test: Experiences from the first successful industrial 5G network tests
09:00 am	Sector Coupling: Industrial IoT Use Cases
09:30 am	Edge, Cloud, Fog - Applications, possibilities and limitations in a fact check
10:00 am	Building a sustainable and intelligent charging infrastructure with new generation of controllers CHARX control modular
10:30 am	The new efficiency of engineering
11:00 am	Control motors easily and cost-effectively
11:30 am	Electrify switchgear successfully and build stable power grids
Noon	Monitoring across Manufacturing Locations: Edge Computing Use Cases in the Industrial Sector
12:30 pm	Smart product solutions, integrated processes - Design your control cabinet production efficient and future-oriented
01:00 pm	Paths to a sustainable industrial transformation - Empowering the All Electric Society
01:30 pm	The key to success in energy efficiency – transparent energy monitoring
02:00 pm	Avoiding expensive downtimes in the automotiv industry
02:30 pm	Maintenance-free communication in real time - the new contactless NearFi technology
03:00 pm	Electrification of vehicles
03:30 pm	Best in efficiency – the digital future of connection technology
04:00 pm	TSN is here! Managed Switches for the new realtime era
04:30 pm	Powerful charging technology as an integrated solution for the All Electric Society
05:00 pm	Drivers of progress – smart device design for the industry
05:30 pm	Smart City – Concepts and solutions for the intelligent city of tomorrow
06:00 pm	Building Intelligence Shaping digital change together
06:30 pm	Made with PLCnext Technology
07:00 pm	Closing words moderators

APRIL 15
THURSDAY

09:00 am	Smart Safety for Industry 4.0
11:00 am	Digital Factory now – Creating added value through intelligent data usage and cyber security in the digital production
Noon	M12 push-pull connectors – a market standard
01:00 pm	Smart Safety for Industry 4.0
02:00 pm	Digital Factory now – Creating added value through intelligent data usage and cyber security in the digital production
03:00 pm	M12 push-pull connectors – a market standard

Each conference lasts about 30 minutes.
All times are based on time zone UTC+1
