

## Welcome

Arquitecura y posibilidades con la nube

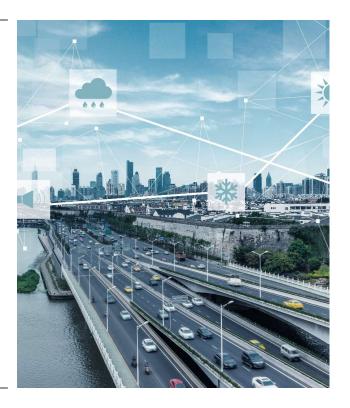

**PROFICLOUD 2.0** 

## Webinars

## **Agenda**

- ➤ Beneficios de la tecnología CLOUD
- ➤ Proficloud 1.0
- ➤ PROFICLOUD 2.0
- Arquitecturas

#### Webinar IMA Enero 2021

## Arquitectura y posibilidades con la nube PROFICLOUD 2.0

Fecha	13 Enero 2021
Hora	9:00
Hora	
Duración	1 hora
Costo	gratuito

Lograr mayor conocimiento de PROFICLOUD y sus aplicaciones en nuevas arquitecturas industriales

Durante esta sesión tendremos mayor profundidad de ejemplos de como instalar, aplicar y desarrollar la utilización de la nube PROFICLOUD con los retos de comunicación ya desarrollados a productos Phoenix Contact y a nuevos equipos que formarán parte de la digitalización prevista para ayudarle en la necesidad de almacenamiento, análisis y cálculos diversos en la nube con enfoque de eficiencia para sus aplicaciones en su planta industrial y/o su solución.

## **Beneficios**

- Remote access; Using cloud services it is very simple to log into a remote machine
- Dashboards; when all the data is in a cloud service you can create a graphical interface that can be accessed globally
- Users; Since the data exists in the Cloud granting access to new users is not restricted to limits on the control hardware in the field
- Historical Data; The cloud can store data for several years to keep in compliance with any regulations
- Services; Many clouds offer different services from predictive analytics to machine learning there are many functions that might help
- Simplicity; Allows companies to focus on their core business (hardware changes

## **Remote Access**

- Outbound Connection ensure that port forwarding is not used.
- Cloud connection used as a gateway to pick the machine that needs service
- Uses strong AES encryption
- Limited to no IT knowledge required by end user

## **Dashboards**

- Data is pushed from the end device into a server sitting on the Cloud.
- Anyone with the right credentials can log into the cloud service and view the data
- 1 way connection can be enabled for security

## **User Management**

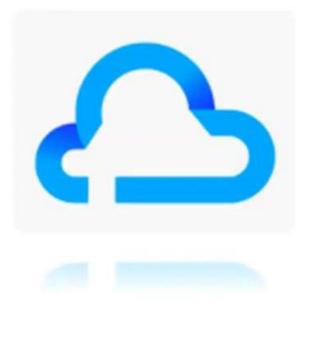

## **Historical Data**

Think of the cloud as being a server. You can quickly get more storange if needed and keep your files for a long time. No need to worry about regulations the data is managed off site and backed up in multiple locations.

## **Services**

More services can be added at the click of a button. Many cloud providers are looking at adding features such as

- Weather tracking
- Predictive maintenance
- Al or Machine learning
- Data Analytics and optimization

## **Simplicity**

The cloud can offer agile development. Rely on the experts to take care of your data and **save yourself from**:

- Staffing in house IT experts
- Having hardware that needs upgrades every 3-5 years
- Updating and patching the software regularly; laas, Saas, Paas

## **Parts of Services**

## What are the differences between IaaS, PaaS and SaaS?

laaS (Infrastructure as a Service) offers the highest level of flexibility in hosting custom applications and a common data center for data storage.

Platform as a Service (PaaS) is typically built on an laaS platform to reduce the need for system administration. It allows you to focus on application software development rather than infrastructure management.

SaaS (Software as a Service) provides out-of-the-box solutions that meet business needs (e.g. website or email). Most modern SaaS platforms are based on laaS or PaaS platforms.

## **Examples of everyday use**

## **Generic Cloud Provider**

Video	Ride Sharing			

## **Examples of everyday cloud functions**

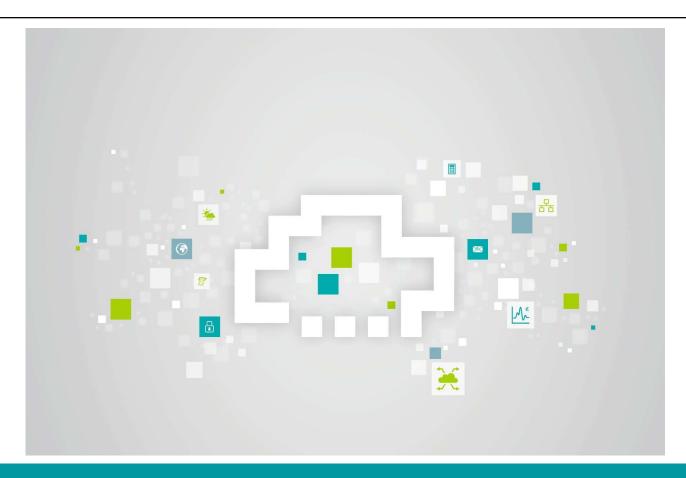

## **Proficioud 1.0**

- Complete offering for Industry 4.0
  - Impulse Analytics: Multi-site manager
  - Community: Blog/ news for the PLC Next, PC Worx Engineer and Proficloud Solution
  - PLC Next Store: Apps store for the PLC Next
  - Community: Blog/ news for the PLC Next, PC Worx Engineer and Proficloud Solution
  - Profinet: Communication of Profinet over Internet
  - TSD Analytics: DashBoard solution
  - TSD Device Manager: Connection and Data base solution.

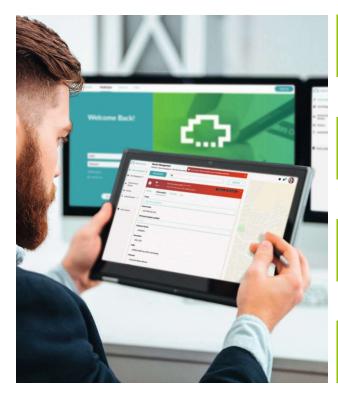

## PROFICLOUD 2.0

## Smart Services@Phoenix Contact

## **Agenda**

## **About Us**

IoT-Plattform Proficloud

**Smart Services for Smart Devices** 

Applications

## **Corporate structure**

**Group Functions** 

## **Core Business Areas**

Device Connectors

Industrial Components and Electronics

Industry Management and Automation

## **New Business Fields**

## **New Business Fields**

Identify, develop and establish new future-oriented business fields

Incubator for new business models, promoting an innovation und start-up culture

**Creating freedom for entrepreneurship and learning curves** 

## **New Business Fields**

# New Business Fields PHOENIX CONTACT Smart Business

Center of expertise for smart service and data science

2020 PHOENIX CONTACT Smart Business GmbH was founded

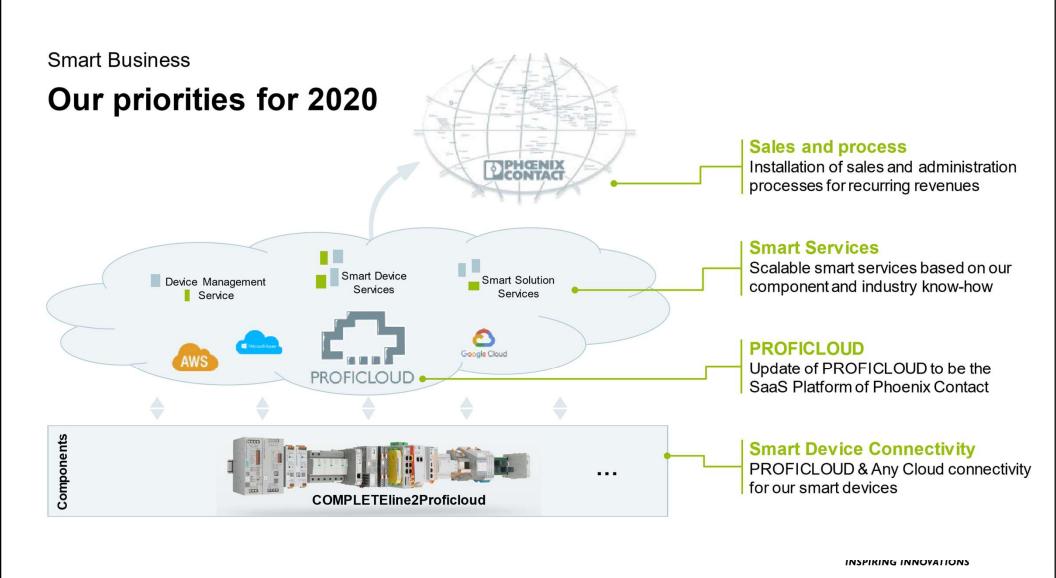

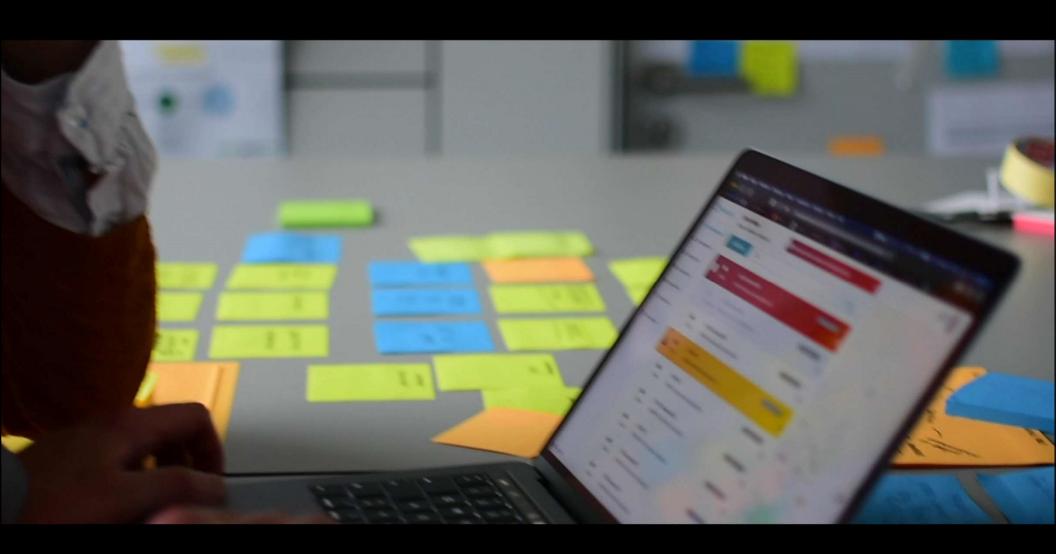

Berlin, Germany Bad Pyrmont, Germany

IoT-based cloud solutions

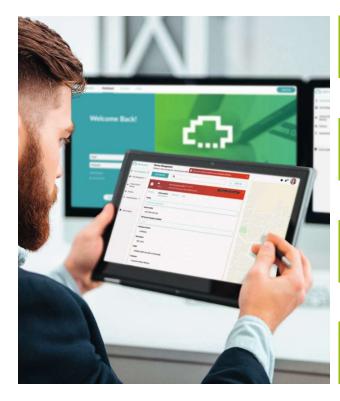

## Smart Services@Phoenix Contact

## **Agenda**

About Us

## **IoT-Plattform Proficioud**

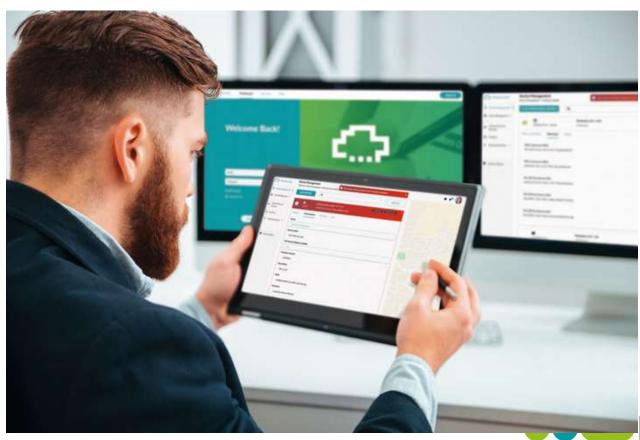

**Smart Services for Smart Devices** 

Applications

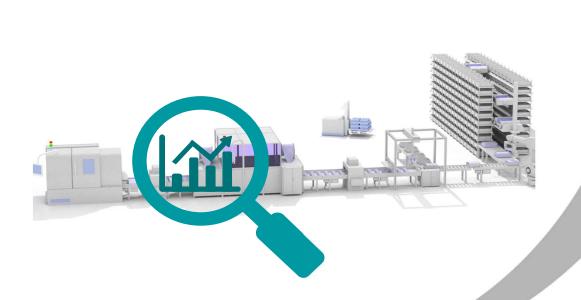

## **Proficioud.io enables state of the art Smart Services**

#### Proficioud.io enables state of the art Smart Services

## **Every Smart Service starts with a Smart Device**

Be prepared for future challenges

Smart services based on data

Cloud-based data access

Smart device to record and extract data intelligently

**From Digital Twin to Smart Services** 

#### Proficloud.io enables state of the art Smart Services

## **Every Smart Service starts with a Smart Device**

#### **Smart networking**

- Smart services from Phoenix Contact are simple and standardized Software-as-a-Service solutions.
- Smart devices are ready for sending data to the cloud – safely and easily.

#### **Smart management**

The service portfolio on the IoT platform comprises for example

- Secure device management
- Real-time measurement
- Cloud-based analysis

- State of health
- Predictive maintenance
- Energy management

#### Proficioud.io enables state of the art Smart Services

## Proficioud.io Advantages of our IoT Platform

#### **Secure**

- From the sensor to the cloud
- Hosting (laaS) at the market leader with server location in Frankfurt

#### **Powerful**

- Unlimited memory and computing power
- Access and user management
- Build-In Visualization/Dashboard

# Proficioud: Professional Cloud Solutions International Cloud Solut

#### **Connective**

- SDK for PHOENIX- and 3rd party devices
- Data normalization for common protocols

#### Intuitive

- Easy user interface
- Single-Sign-On for all Services related to Software at PHEONIX CONTACT

#### **Extendable**

- Connectivity to AWS, AZURE, Alibaba, ...
- REST API

#### **Flexible**

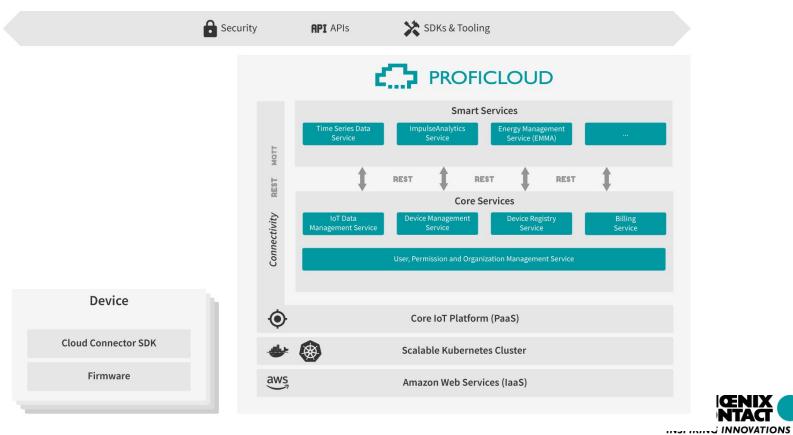

- Different laaS applicable e.g. AWS, Alibaba, ...(later relocation possible)
- Comprehensive support of recurring revenue streams, e.g. subscription fees

#### Proficloud.io enables state of the art Smart Services

## Proficioud.io is based on a flexible microservice architecture

Software Development Kit (SDK)
Roadmap

## **Smart Devices connected to Proficioud**

#### **Trabtech - Impulsecheck**

#### Status:

- Launch at HM 2019
- First experiences and learnings from working with customers.
- GIT\* Award 2020

#### Interface - EMpro

#### Status:

- EMpro launched at HM 2019
- Becomes smart HM 2020
- REST API and Web Versions support integration of Smart Services into customer environm.

#### **Interface – Machine Manager**

#### Status:

- Use case shown at HM 2019.
- First digital service "anomaly detection" developed and further discussed with customers.

#### **Power Supplies – Quint UPS**

#### Status:

- Since 2017 UPS with e.g. State of Health Capability (VOC: these snapshots are decisive...)
- 2021 launch of Quint with Anomaly Detection

\*German Publisher, famous for B2B professional journals belonging to the Wiley Group, a US Publishing House

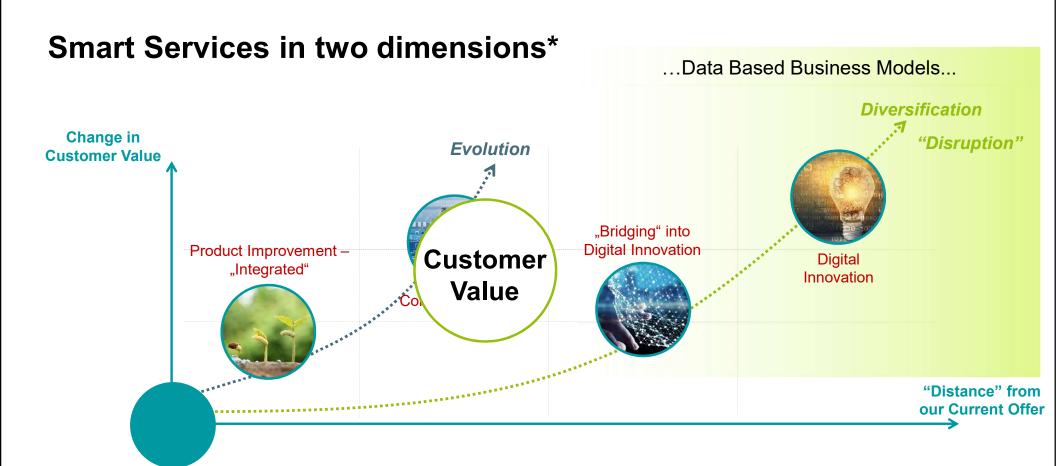

## We basically distinguish three types of Smart Services

	DEVICE MANAGEMENT SERVICE	SMART DEVICE SERVICES	SMART SOLUTION SERVICES		
z	<b>Minimal standard</b> for all PROFICLOUD-compatible products	Standardized value-added service for different industries / applications	Industry or application-specific value-added service		
<b>EFINITIO</b>	Standardized, application- independent device information in real time	Direct linkage to one <b>or more</b> PROFICLOUD-capable products	<b>Combination</b> of Smart Device Services		
Δ	Fulfillment of <b>minimum requirements</b> for industrial products in <b>the digital age</b>	High data value added and additional features for our customers			

Value add

<sup>\*</sup> With reference to VDMA = Mechanical Engineering Industry Association

# Device Management Service - minimal standard for all Proficioud-compatible devices

The Device Management Service for Phoenix Contact devices offers a standardized, application-independent device information in real time on Proficloud. In the digital age for industrial products this is the fulfillment of minimum requirements for smart devices.

In this way, health statuses and general information can be called up from anywhere in the world.

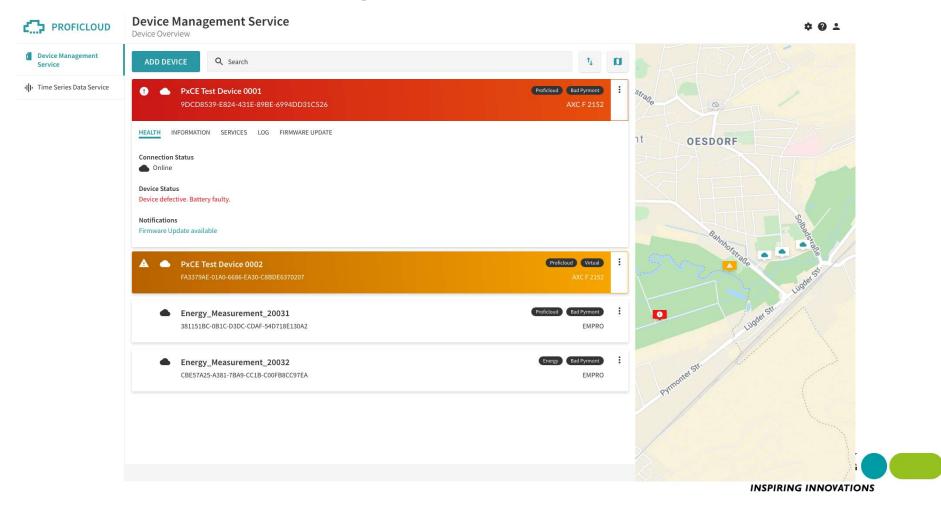

No more wasting time having to visit your facilities with personnel to assess the health status of the facility. A quick look into the Device Management of the Proficloud is enough. Each status message of each hardware device is translated into plain text, so you don't need expert knowledge to understand it. Save resources, time and nerves.

Furthermore, Device Management allows you to keep your hardware up to date, so you can be sure that the devices are always provided with the latest firmware security updates. You can quickly and easily get an overview of several locations and plan measures based on Device Management.

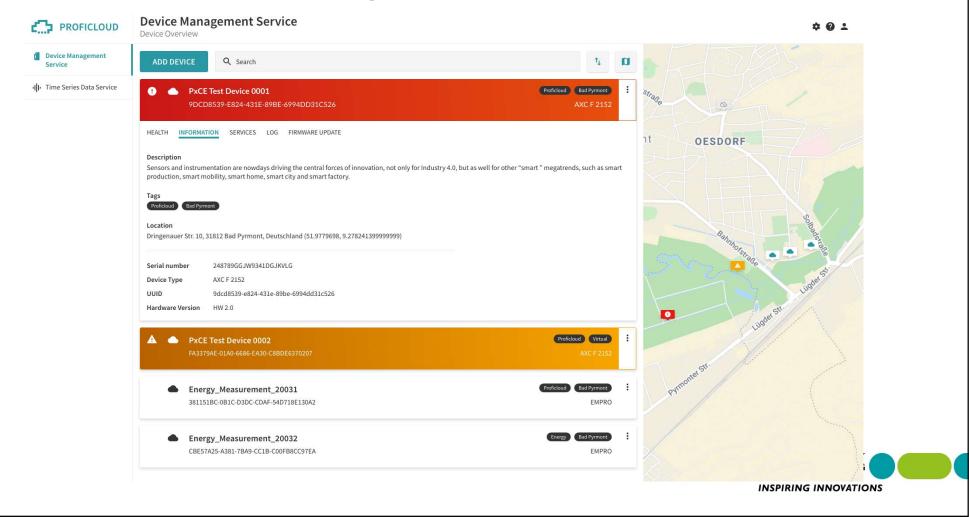

The Device Management Service within the Proficloud is free of charge and thus offers a perfect cost/benefit calculation.

About Us

IoT-Plattform Proficioud

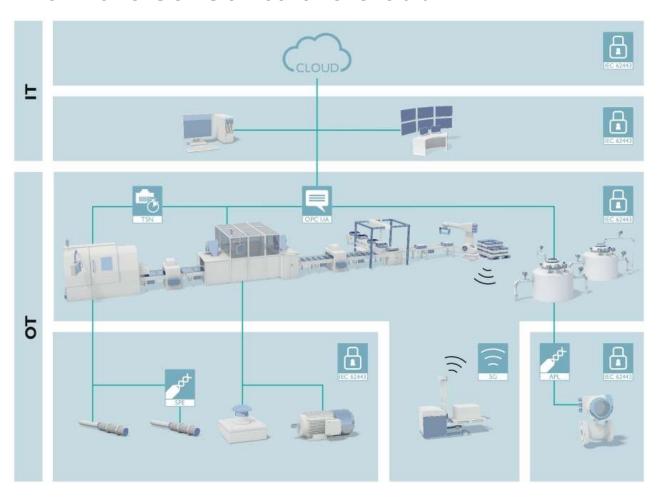

**Smart Services for Smart Devices** 

**Applications** 

# From the sensor to the cloud

#### Added Value

- IEC-62443
- OPC UA
- TSN
- SPE I APL
- 5G

#### Proficioud.io enables state of the art Smart Services

# **Applications - Energy data monitoring and analytics**

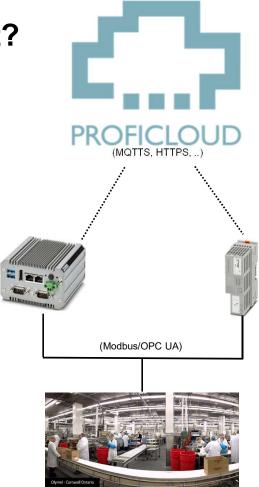

#### **Target**

Optimization energy
consumption of injection
molding machines
Detection of wear due to higher
current consumption

# **Proficioud.io How to Connect?**

PROFICLOUD

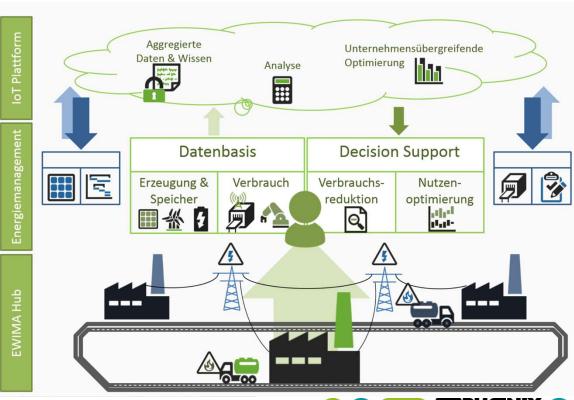

#### Proficioud.io enables state of the art Smart Services

# **Applications - ewima**

**INSPIRING INNOVATIONS** 

#### Proficloud.io enables state of the art Smart Services

#### **Applications - Predictive maintenance**

#### **Benefits:**

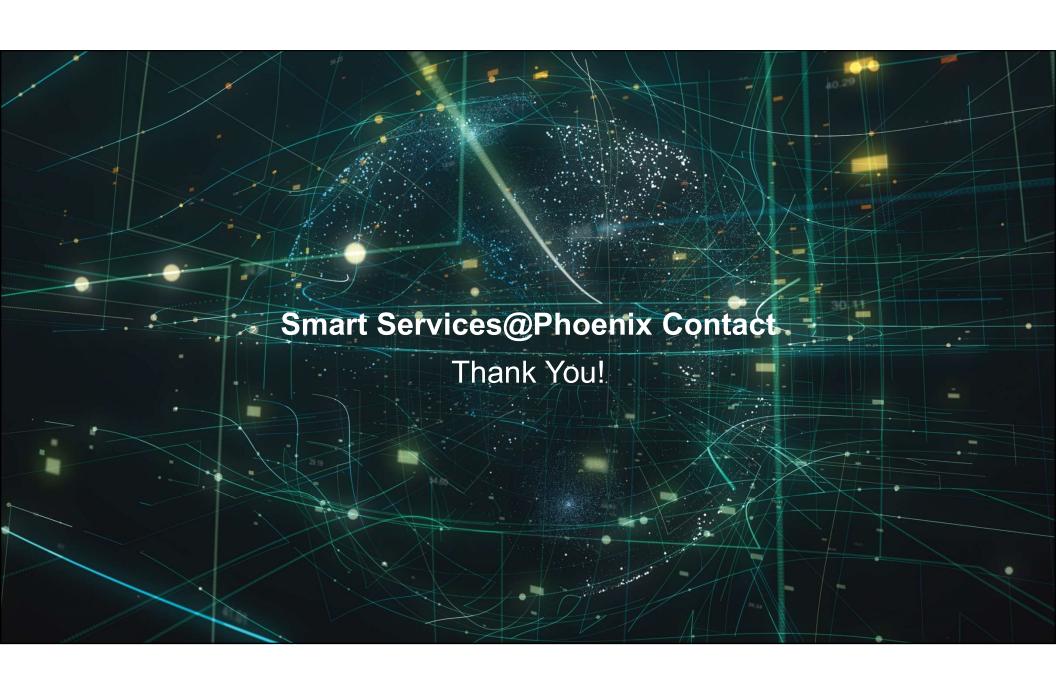

- Reduction of critical downtimes
- Avoid unplanned service costs
- Increase productivity
- Reduction of the cost of spare parts provision

#### **Data analysis**

Correlation between operation, configuration and setting of the production plant and the downtime.

Determination of the factors leading to a standstill. Derivation of algorithms, with which also short disturbances can be predicted.
