

Ethernet finally goes the distance

Connectors for Single Pair Ethernet

Ethernet finally goes the distance

Ethernet is the leading communications protocol for local data networks (LAN) at the corporate and operational level. With the advent of Single Pair Ethernet, this established protocol is now also moving down to the field level. Single pair data cabling is innovative, efficient, and future-proof. Join us on the journey into the future of the Industrial Internet of Things (IIoT).

- Compact device and cable connectors for Single Pair Ethernet
- Standardized SPE interfaces for secure data transmission in accordance with IEEE standards

- Reliable interfaces for Single Pair Ethernet in process automation
- Versatile device connection technology for Ethernet APL

Connection technology for factory automation

Device and cable connectors for IP20 and IP67 degrees of protection in accordance with IEC 63171.
For further information, see pages 4 and 5.

Connection technology for process automation

PCB terminal blocks and PCB connectors for increased safety requirements (APL – Advanced Physical Layer).
For further information, see pages 8 and 9.

Connection technology for building automation

Potential Single Pair Ethernet applications in building automation.
For further information, see pages 12 and 13.

Connection technology for factory automation

Phoenix Contact has launched compact device and cable connectors for the Single Pair Ethernet standard. The standardized interfaces in accordance with IEC 63171-2 (IP20), IEC 63171-5 (M8/M12), and IEC 63171-7 (M12 HYBRID) offer the right solution for every environment. The application-specific, optimized cabling is therefore the basis for future-proof networking from the sensor to the cloud.

M8, M12/
M12 Hybrid

 Web code:
#2670

IP20

 Web code:
#2671

Your advantages

IP20 connectors

Standardized connectors and cables for the control cabinet in accordance with IEC 63171-2 (IP20).

M8 and M12 connectors

Robust and protected connectors in the M8 and M12 industry standard in accordance with IEC 63171-5.

M12 HYBRID connectors

Combined data and power transmission in size M12 in accordance with IEC 63171-7.

Compact

Miniaturized connectors enable high packing density and compact communication devices for the IIoT.

Cross-application

Ranges of up to 1,000 m, data rates of up to 1 Gbps, and power of up to 50 W.

Easy design-in

Two-piece M8 device connectors ensure identical mechanical installation conditions and consistent housing designs.

Device and cable connectors

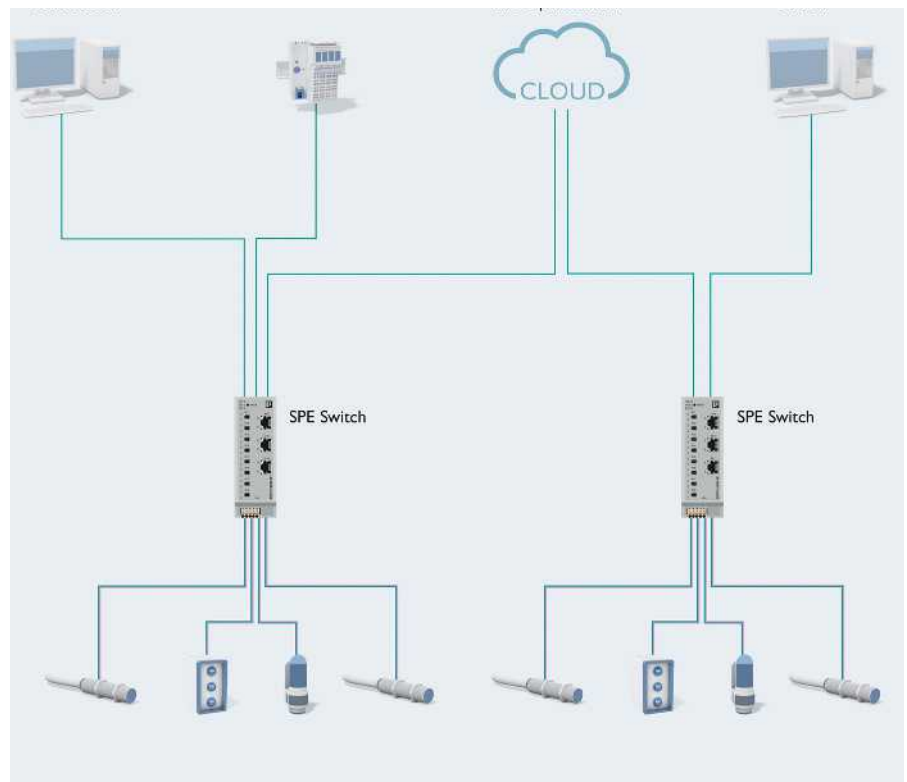

IP20/IP67 degree of protection

The consistent pin connector pattern of IEC 63171-2 and IEC 63171-5 standardizes the SPE interface across applications in the field and is compatible with standardized M8 and M12 threads and push-pull solutions.

Application and product examples

Ethernet has been the established protocol in local data networks at the corporate and control level for decades. With Single Pair Ethernet, you can reduce the data cabling down to just one wire pair and increase the range. This enables efficient transmission concepts at the field level – right down to the sensors. The star topology with (redundant) active network components can be extended easily, allows high and different data rates, and is reliably protected against the failure of individual components.

Future-proof and compact: Single Pair Ethernet in factory automation

Managed switches for Single Pair Ethernet

new

i Web code: [#2912](#)

Description	Managed switches
SPE interfaces	8 x 10 BASE-T1L
RJ45 interfaces	3 x 100 / 1000 BASE-TX
SPE device supply	Optionally via PoDL (Power over Data Line)
PoDL power class	24 V DC power class 11 (IEEE 802.3 cg)
Supply voltage	18 V DC ... 32 V DC
Managed features	Real-time QoS, redundancy, security features
Management interface	Web, SNMP, CLI, PROFINET device
Type	FL SWITCH 2303-8SP1
Item no.	1278397

Connection technology for process automation

Explosion protection and long transmission paths place high demands on network technology. The necessary standards have been collated into the Advanced Physical Layer (APL).

Phoenix Contact provides proven, reliable PCB terminal blocks and PCB connectors as well as RJ45 and circular connectors for switch-based Ethernet networks in process automation.

PCB connection

 Web code:
#2390

RJ45/M8/M12

 Web code:
#2839

Your advantages

Qualified for Ethernet APL

Items satisfy the requirements of the "APL Port Profile Specification".

Wide range of possible applications

Horizontal, vertical, and angled conductor connection direction for every device design.

Error-proof conductor connection

Color coding and identification for easy wiring.

Reliable and safe

Items available for increased safety requirements of "Ex e" type of protection in accordance with IEC 60079-7 in potentially explosive areas.

Adaptable

IP20 and IP67 RJ45 connector versions are also suitable for use with Ethernet APL.

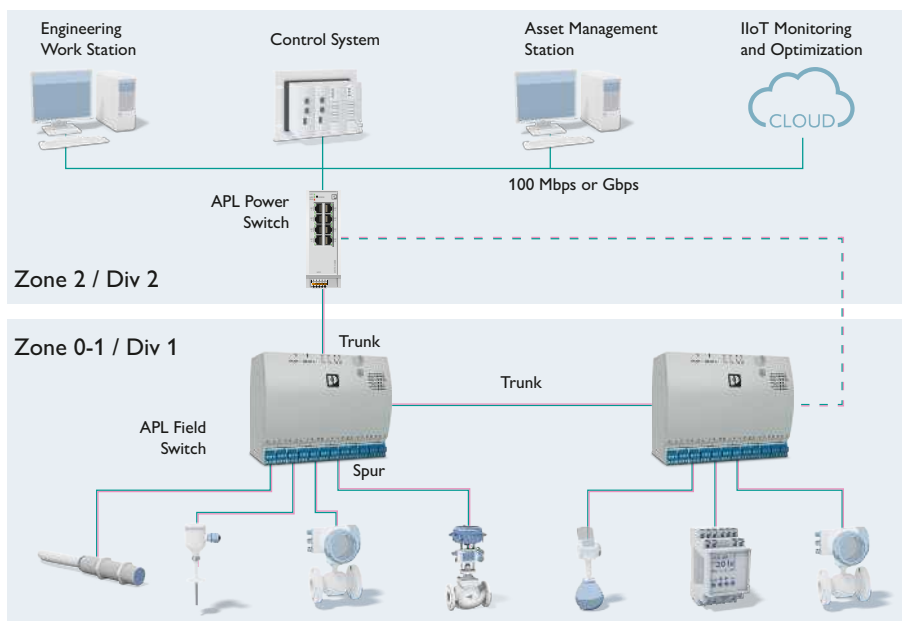

Protected against mismatching

M12 and M8 circular connector versions with Ethernet-APL-specified A-coding.

Application and product examples

The Advanced Physical Layer is suitable for the transmission of data and power over distances of up to 1,000 m – ideal for redundant network structures. This allows power and field switches to be supplied efficiently via trunk lines and sensors and actuators to be integrated safely via branch lines (spurs).

A strong partnership for the promotion of SPE technology

The SPE System Alliance

The SPE System Alliance is an open alliance of leading technology companies from different industries and fields of application. All partners of the SPE System Alliance are pursuing the joint goal of promoting Single Pair Ethernet for IIoT applications. As part of this, they are combining their expertise in the field of SPE and are engaging in purposeful dialog.

Connection technology for building automation

Compact, standard-compliant, and easy to maintain – PCB connections and connectors must meet the specific requirements of building automation. Plug-in and permanent connections enable the creation of tailor-made solutions. Proven contact and connection technologies and additional comfort functions ensure a consistently high level of safety during operation. Rely on intelligent solutions from Phoenix Contact for smart device connections.

Excellent services

Throughout your development process, Phoenix Contact will provide excellent services that make the difference. Discover how modern configurators, comprehensive technical data, and free product samples can make your daily work easier. As your partner, we will support you in the design-in process all the way to the development of customized connection and housing solutions.

The easy way to more choice

Choose online from 60,000 products and find the right solution quickly:

- Intuitive filter and search functions
- Comprehensive technical data and downloads such as drawings and 3D models
- Personal on-site consultation

The easy way to more individuality

Customize your products with colors, printing, and special designs:

- Customer-specific versions
- Customized new products
- Intuitive online configurators

Simple selection using filters and technical data

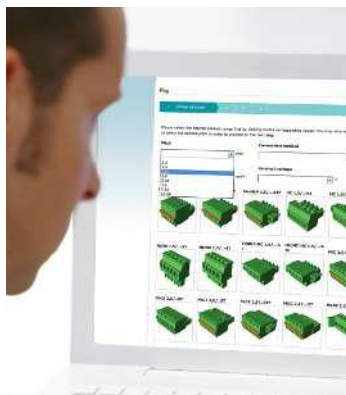

There is a separate detail page for every product

A data sheet is available to download for every item

With our global network, Phoenix Contact is always nearby

Device connection technology can be comprehensively configured

Housing parts and connection technology are easy to configure

Cable and assembly systems can be matched easily

Phoenix Contact supports you from the initial idea right through to series production

Further information on
Phoenix Contact services:
Simply enter the web code in
the search field on our website.

i Web code: #2594

Excellent services

Phoenix Contact supports device designers with excellent services, even beyond the design-in process. Benefit from flexible procurement and global availability of our items. As your expert partner, our experts will keep you up to date on the latest technologies and trends.

The easy way to more flexibility

Use our different procurement channels and benefit from worldwide availability:

- All products can easily be ordered online
- Free online sample service
- Globally reliable logistics through direct shipping or distribution

The easy way to more expertise

Always stay up to date on technologies and trends with us as your reliable partner:

- Technology, industry, and design-in experts at your side
- We will provide you with custom training programs – either on site or digitally
- Free webinars, seminars, and video tutorials

Our online sample service is available in a large number of countries

Find the desired product quickly with intuitive filters

Product samples are available with free shipping

Reliable logistics worldwide

Keep up to date on new products, trends, and technologies

We will provide you with custom training programs – either on site or digitally

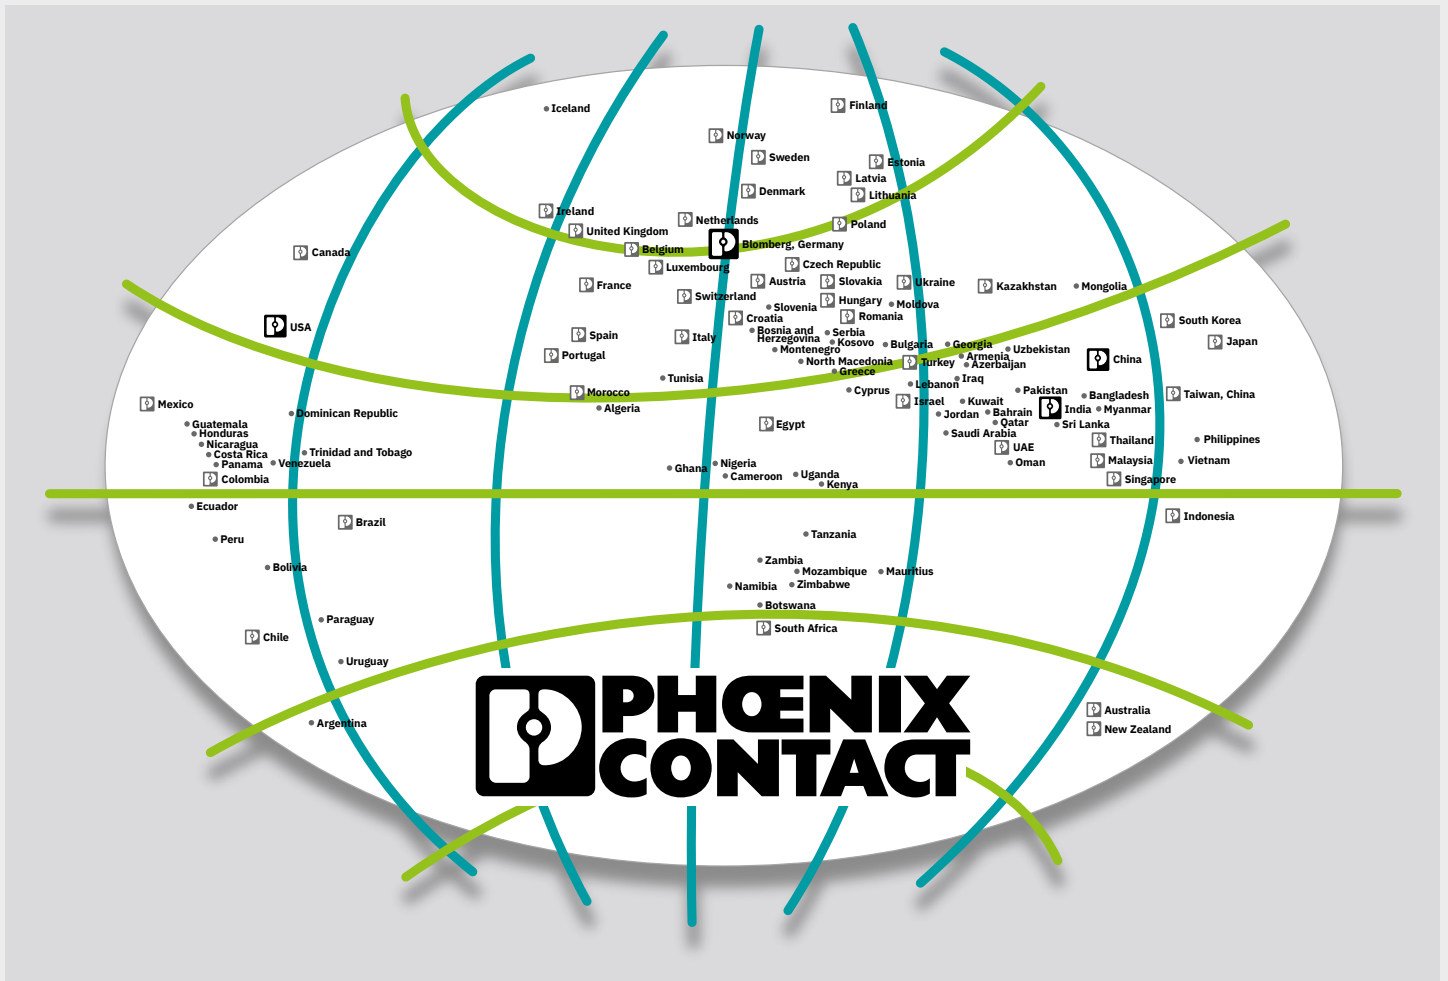

The latest information via the Phoenix Contact apps and YouTube channel

Remain reliably updated with the Phoenix Contact newsletter

Further information on Phoenix Contact services:
Simply enter the web code in the search field on our website.

Open communication with customers and partners worldwide

Phoenix Contact is a global market leader based in Germany. We are known for producing future-oriented products and solutions for the electrification, networking, and automation of all sectors of the economy and infrastructure. With a global network reaching across more than 100 countries with over 21,000 employees, we maintain close relationships with our customers, something we believe is essential for our common success.

Our wide range of innovative products makes it easy for our customers to implement the latest technology in a variety of applications and industries. This especially applies to the target markets of energy, infrastructure, industry, and mobility.

You can find your local partner at
phoenixcontact.com
