## Confirmation of the business unit Industrial Cabinet Solutions

Dear Sir or Madam,

Phoenix Contact torque screwdrivers leave production after calibration and a final test in a perfect condition regarding safety. The initial calibration has to meet our highest demands and we guarantee a high level of accuracy of the limit values, tolerances and measuring ranges.

The subsequently listed standards are taken as a basis for the testing of the adjustable torque screwdriver:

**DIN EN ISO 6789 / Assembly tools for screws and nuts – Hand torque tools – Requirements and test methods for design conformance testing, quality conformance testing and recalibration procedures.**

**DIN ISO 1173 / Assembly tools for screws and nuts – Drive ends for hand- and machine-operated screwdriver bits and connecting parts – Dimensions, torque testing.**
